

Music-On-Hold Audio Adapter

For use multi-line and KSU-less phones

Music-on-hold for ordinary phones

Add on-hold audio capability to ordinary single or multi-line phones...for real! For years, what has been the "Holy Grail" of on-hold audio technology is now an affordable reality for any size business.

The MOH 500e works with virtually all single and multi-line phones, as well as the new, non-KSU, corded and cordless phone systems (cordless systems require use of a head set). Just one unit provides music-on-hold capability on one to four lines and up to 16 different phone extensions. Introducing TEHMA

In order to achieve true "hold button" activation, we created a small module called a TEHMA (telephone extension hold music activator). This line-powered activator connects between the base of your phone and the handset cord and sends a signal down the phone line telling the MOH 500e unit whether or not the phone is on-hold. Only phone extensions with a TEHMA can put a call on-hold with the phone's hold button.

Phones without a TEHMA can put a call on-hold by pressing the star key twice and then pressing the phone's hold button.

The MOH 500e ships with 2 TEHMAs. Additional activators can be ordered from your reseller or from the On-Hold Plus on-line store.
