without Vitruvius or Hero of Alexandria's preserved writings. The point of this book is to emphasize with new findings that had the Romans not stopped the growth of science and technology in the Hellenistic Period that it would have likely continued to develop into a full fledged Industrial Revolution. Secondly the more recent Industrial Revolution borrowed heavily on the technology and science of the Hellenistic Period. In the true sense of the Renaissance 17th century industrial progress largely picked up the written remnants of Antiquity to be able to continue on after a centuries long caesura.
