The strong interdisciplinary approach

draws together lessons from both physical and social science providing an original empirical investigation into the climate politics of the UK trade union movement from high level officials down to workplace climate representatives from issues of climate jobs to workers climate action This book will be of great interest to students and researchers in environmental politics climate change and environmental sociology **Teacher Preparation at the Intersection of Race and Poverty** in Today's Schools Patrick M. Jenlink, 2019-08-09 Teacher Preparation at the Intersection of Race and Poverty in Today s Schools introduces the reader to a collection of thoughtful works by authors that represent current thinking about teacher preparation Importantly the book is divided into two primary sections the first being four chapters that offer understanding of the depth and breadth of the intersection of race and poverty as it relates to teaching and teacher preparation. The second section presents Dialogues of Teacher Education focused on Meeting the Challenge of Race and Poverty in Our Schools The Role of Teacher Education with eight contributing authors who reflect on and give voice to meeting the challenge Finally two book reviews are presented that align with the concern for preparing teachers to enter schools at the intersection of race and Social Sciences and Interdisciplinary Behavior Ford Lumban Gaol, Fonny Hutagalung, Nailya poverty on a daily basis Bagautdinova, Lenar Safiullin, 2016-09-19 Social Sciences and Interdisciplinary Behavior contains papers that were originally presented at the 4th International Congress on Interdisciplinary Behavior and Social Science 2015 ICIBSoS 2015 held 22 23 October 2015 at The Institute of Management Economics and Finance of the Kazan Federal University Kazan Russia and 7 8 November 2015 in Arya Duta Hotel Jakarta Indonesia The contributions deal with various interdisciplinary research topics particularly in the fields of social sciences education economics and arts The papers focus especially on such topics as language cultural studies economics behavior studies political sciences media and communication psychology and human development Morality and Epistemic Judgement Christopher Cowie, 2019 Moral judgments attempt to describe a reality that does not exist so they are all false This troubling view is known as the moral error theory Christopher Cowie defends it against the most compelling counter argument the argument from analogy Cowie shows that moral error theory does not compromise the practice of making epistemic judgments — *Creativity of an Aha! Moment and Mathematics Education* ,2021-05-25 Creativity of an Aha Moment and Mathematics Education introduces bisociation the theory of Aha moment creativity into mathematics education It establishes relationships between Koestler's bisociation theory and constructivist learning theories It lays down the basis for a new theory integrating creativity with learning to describe moments of insight at different levels of student development The collection illuminates the creativity of the eureka experience in mathematics through different lenses of affect cognition and conation theory of attention and constructivist theories of learning neuroscience and computer creativity Since Aha is a common human experience the book proposes bisociation as the basis of creativity for all It discusses how to facilitate and assess Aha creativity in mathematics classrooms Contributors are William Baker Stephen Campbell Bronislaw Czarnocha Olen Dias Gerald Goldin Peter Liljedahl John Mason Benjamin Rott Edme Soho Hector Soto Hannes Stoppel David Tall Ron Tzur and Laurel Wolf **Ubiquitous Translation Piotr** Blumczynski, 2016-06-23 In this book Piotr Blumczynski explores the central role of translation as a key epistemological concept as well as a hermeneutic ethical linguistic and interpersonal practice His argument is three fold 1 that translation provides a basis for genuine exciting serious innovative and meaningful exchange between various areas of the humanities through both a concept the WHAT and a method the HOW 2 that in doing so it questions and challenges many of the traditional boundaries and offers a transdisciplinary epistemological paradigm leading to a new understanding of quality and thus also meaning truth and knowledge and 3 that translational phenomena are studied by a broad range of disciplines in the humanities including philosophy theology linguistics and anthropology using various often seemingly unrelated concepts which nevertheless display a considerable degree of qualitative proximity. The common thread running through all these convictions and binding them together is the insistence that translational phenomena are ubiquitous Because of its unconventional and innovative approach this book will be of interest to translation studies scholars looking to situate their research within a broader transdisciplinary model as well as to students of translation programs and practicing translators Everything, Briefly Thomas O. who seek a fuller understanding of why and how translation matters Scarborough, 2022-06-14 As a man thinks so is he Personally and socially so is he Yet if this is true then as a man thinks has led us into the thick of global crisis What exactly is it about our thinking that fails us What has gone so wrong There are firm reasons why we may hope for new direction Firstly we have a new view of the connectedness of all things Never before has this encompassed so much It makes a crucial difference to philosophy Secondly when we recast philosophy s high level concepts in more concrete terms it becomes possible to discuss them without confusion This is the method of this book There is much of interest for the theologian too Legendary film director Ingmar Bergman once wrote What will happen to us who want to believe but can not His can not had to do with what Professor Karen Barad calls the hegemony of physics Everything Briefly details why it is impossible in fact to believe in a closed universe of cause and effect Creativity and Technology in Mathematics Education Viktor Freiman, Janet Lynne Tassell, 2018-09-03 This volume provides new insights on creativity while focusing on innovative methodological approaches in research and practice of integrating technological tools and environments in mathematics teaching and learning This work is being built on the discussions at the mini symposium on Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness ICMCG in Denver USA 2014 and other contributions to the topic The book emphasizes a diversity of views a variety of contexts angles and cultures of thought as well as mathematical and educational practices.
