various natural disasters have duplicated the forced displacement of millions of people across the seven continents of the planet. This situation brings important challenges in terms of the vulnerability, inequity and discrimination that certain peoples suffer. Professionals from the fields of the social sciences, education, psychology and international law share the fact that education represents an opportunity for children and young migrants to become members with full rights in the societies they arrive in. Empirical studies show that the implementation of the right to education for migrants presents some challenges and dilemmas to the governments of host countries and more specifically to the education centers, NGOs, universities and the professionals working in them, hence the need for more research on these issues of immigration, refugees, social justice and intercultural education.

The Handbook of Research on Promoting Social Justice for Immigrants and Refugees Through Active Citizenship and Intercultural Education provides visibility to issues such as the increase in migration and displacement and the difficulties in political agreements, educational contexts and in cultural issues, stigmatization, vulnerability, social exclusion, racism and hatred amongst host communities. This book gives possible solutions to this current complex situation and helps foster and promote sensitivity, perspective and critical thinking for a respectful and tolerant coexistence and promotion of equity and social justice. The chapters promote cultural diversity and inclusion in classrooms by offering knowledge, strategies and research on organizational development for educational institutions and multicultural environments. This book is essential for administrators, policymakers, leaders, teachers, practitioners, researchers, academicians and students interested in the promotion of social justice in education for immigrants and refugees.
