Landscape Leentjie van Jaarsveld,Kobus Mentz,Charl C. Wolhuter,2020-12-31 The argumentative point of departure of this scholarly book is the common conviction of specialists in the field of education in South Africa that the national education system is not at a satisfactory level in both the academic and the public discourse Such allegations are made and frequently stronger adjectives than non satisfactory are used Results of international test series in which South Africa has participated such as the 2015 TIMSS tests confirm the negative verdicts found in the public and scholarly discourse This book aims to argue that although the lack of performance could be attributed to a multiplicity of factors one factor that can make a difference in the achievement levels obtained by learners in schools is leadership The book demonstrates that a particular problem of both the scholarly and the public discourse on education in South Africa is an overtone of defeatism or resignation blaming all ills in the education system and educational institutions on historical legacies and or contextual factors such as socio economic deprivation in the catchment areas of schools or poor resources and infrastructure This collected work was inspired by a recently published spate of articles on top performing schools including top performing schools in rural communities in which it was demonstrated that good leadership can overcome such contextual and other challenges The book unpacks the issue of leadership in South African schools from a variety of perspectives thus contributing to the development of the scholarly discourse on Educational Leadership in South Africa The target audience of the book is scholars of Educational Leadership The research reported in the chapters draw on a wide range of methodologies including empirical survey research questionnaires and interviews critical literature surveys and the comparative method **A New Dawn**

Deon Vos,Zacharias Louw de Beer,Ewelina Niemczyk,2020-12-31 BRICS is a significant player in the international arena Thus it is important for South Africa as a member of BRICS to explore the implications of the external and internal influences of BRICS This includes comprehensive understanding of the international and national involvement of BRICS in education provision and introducing discovered influences in South African educational planning The size of BRICS as international player in different areas and on different levels necessitates the research of its functioning and in this case the role of BRICS regarding education provisioning Therefore this research and analysis of the contribution of BRICS in education provision are an important addition to the field of effective Education Through the preliminary literature reviews we noticed that current studies often are quantitative in nature and lack comparative qualitative exploration about education development in BRICS countries For this reason the book titled BRICS Education A new dawn will contribute to the flourishing of quality

education in South Africa and all BRICS nations The book will also aim to encourage researchers to join efforts with other researchers of the five member states in order to learn from each other and to address common challenges To that end this research will generate scientific knowledge meant to maximize the readers understanding of the current realities of the education aims at the national each member state and collective BRICS organization level The authors of the book are interested in comparing the educational aims across the BRICS countries and explore how successfully these aims are being implemented on the ground Through the discovering of similarities and differences in the educational aims of the five member states and the educational objectives of the BRICS organization the readers of the book will be able to identify best practices that will allow member states to fulfill the education aims of the BRICS organization at large

A path to wellness in the educational and health systems Lynn Preston, Wanda van der Merwe, 2023-11-30 The Six Bricks initiative is a teaching and learning method that encourages focused engagement in the classroom by all learners from the foundation phase to adulthood By using six simple colourful DUPLO bricks an element of play is introduced into a situation that inevitably leads to all individuals focusing and interacting This is one of the major contributions to all teaching and learning disciplines and promotes the audience to learn with enjoyment enthusiasm and concentration Along with this communication is promoted sparking unimaginable creativity and creation This book provides the reader with an alternative focus to the original educational application of the Six Bricks activities This Six Bricks initiative focuses on the therapeutic application and processes in communities schools and within individuals themselves As each author has had an intimate connection with Six Bricks initiative they are all more than qualified to provide their autoethnographic reflections on this initiative which holds so much promise and excitement for learning and teaching Therefore each author's contributions were original and personalised providing a new field in the avenues of research in the South African context as South Africa does not have as yet much research on this topic The methodology used in this qualitative research study was primarily from each author's perspective thus their self reflection and anecdotal personal experiences form the core of these chapters Therefore this autoethnographic is a self reflective form of writing which involves self observation and reflective investigation in the context of ethnographic fieldwork and writing
