Perry, Marilyn J. Hockenberry, Deitra Leonard Lowdermilk, David Wilson, 2017-09-01 NEW Updated content throughout corresponds to new features and chapters of the text Reading Instruction in the Armed Forces Lowry Waring Harding, James Burgett Burr, 1950 Publishers' Circular and General Record of British and Foreign Literature, and Booksellers' Record, 1894 **Clinical Manual for Assessment and Treatment of Suicidal Patients** John A. Chiles, Kirk D. Strosahl, Laura Weiss Roberts, 2018-08-23 Since the first edition of Clinical Manual for Assessment and Treatment of Suicidal Patients was published in 2005 advances have been made that increase our understanding of suicidal and self destructive behavior Although clinicians cannot unerringly predict which patients will die by suicide they can focus more successfully on early identification of suicidal behavior and effective intervention and this new edition of the clinical manual thoroughly explores not only assessment of suicidality but what comes after an at risk patient has been identified The authors argue that treating specific psychiatric disorders is not enough to prevent suicide and they offer clinicians the necessary information and strategies to bridge that gap The authors main premise is that suicide is a dangerous and short term problem solving behavior designed to regulate or eliminate intense emotional pain a quick fix where a long term effective solution is needed and this understanding is the underpinning of the assessment and treatment strategies the authors recommend The content of this new edition has been thoroughly reviewed and revised and substantive changes have been made to specific chapters to ensure that the book represents the most current thinking and research while retaining the strengths of the previous edition The chapter on assessment has been

revised to put the fundamental components of effective treatment in a clinical case oriented context and includes an easy to use assessment protocol that allows clinicians to determine where individual patients stand on seven dimensions cognitive rigidity problem solving deficits heightened mental pain emotionally avoidant coping style interpersonal deficits self control deficits and environmental stress and social support deficits The many issues involved in the use of psychotropic medications in suicidal patients are addressed in a new chapter which includes information on the relevant classes of drugs such as antidepressants and anti-anxiety agents and the issues that may arise with their use including side effects degree of lethality and tendency to aggravate suicidality on introduction and withdrawal of the medication The chapter on special populations has been expanded to include adolescents elders and patients with co-occurring substance abuse or psychosis Because of additional vulnerabilities treating these groups may call for the use of added or special techniques to ensure the best therapeutic outcomes Primary care physicians are the first point of contact for many patients and they may require additional preparation in order to assess and respond to those experiencing suicidal thoughts The chapter Suicidal Patients in Primary Care explores strategies for screening recognizing and assessing risk treating the initial crisis and developing a crisis management plan Tips for Success appear at intervals and The Essentials are included at the end of each chapter highlighting the most important concepts In addition there are scores of helpful charts and exercises Practical accessible and reader friendly the Clinical Manual for Assessment and Treatment of Suicidal Patients is not an academic book but rather is one designed to become an indispensable part of clinicians working libraries *Nature* Sir Norman Lockyer, 1891
