BIOLOGY: Evolution

Directions: Answer the following questions after watching the video "Dogs and More Dogs."

1. What is general about the species of the dog that makes it so interesting to biologists?

The species of dog is so interesting because there are so many different types of dogs that are all different from each other – yet they all come from the same ancestors. The whole world of domesticated breeds are based on that original 15,000-year-old wolf.

2. How have two major hypotheses about how dogs evolved from wolves (they) been?

a) First humans managed to domesticate the wolf packs by tending them and feeding the wild pups during the winters. b) First people were willing to be tamed and they became dogs and not the other way around. Humans in Mongolia discovered wolves as useful predators (sheep herders).

3. Effectuate the observation in the Tjorne dogs that subsisted continuously?

The observation in the Tjorne dogs relates to the continuously increasing genetic gap that is likely that after humans started to tame domesticated wolves, humans were behind around human's domestication. Domesticated wolf remained. This relation with Tjorne dogs observation indicates an ancient role in domestication. About many animals are being kept and tamed and have been domesticated and it started as early as 15,000 years ago. This could have been just about 15,000 years ago.

4. Rational explanation to the two ways to explain physical differences between dogs and wolves. What are the major differences?

Some major differences between dogs and wolves are that dogs have smaller, more domesticated, generally, and a more tame and domesticated nature than they would have. Domesticated wolves have floppy ears while most wolves have stiff ears. Dogs also have curled up tails while wolves have stiff tails.

5. Which evolutional mark dogs were, partly made and domesticated, since it would have helped domestication. Do you think that humans domesticated them? What about the experiment in German dogs?

The experiment in German showed that the features that dogs have developed (aggression, they)

Dogs would live longer if ... Jutta Ziegler, 2014-06-13 Millions of cats and dogs live in European and American households, and almost all of them are regularly treated with far too many and useless vaccinations, chemical coshes called medicines, and absurd diet meals which make them ill. In her bestselling tell-all book *Dogs would live longer if*, veterinarian Dr. Jutta Ziegler points out everything that is going wrong in veterinary practice. She reveals the interdependence of the veterinary business and the animal feed industry and offers case examples to explain how our pets should NOT be fed and treated. This book offers important information and advice for the responsible pet owner on how to protect their animal and themselves against corrupt and unscrupulous veterinarians for whom money is more important than ethics, and who opt to put on the line the lives of the animals entrusted to them, giving priority to their own wallet. Every pet owner who loves their pet should read this book.

Pit Bull Bronwen Dickey, 2016-05-10 The hugely illuminating story of how a popular breed of dog became the most demonized and supposedly the most dangerous of dogs, and what role humans have played in the transformation. When Bronwen Dickey brought her new dog home, she saw no traces of the infamous viciousness in her affectionate, timid pit bull. Which made her wonder: How had the breed beloved by Teddy Roosevelt, Helen Keller, and Hollywood's Little Rascals come to be known as a brutal fighter? Her search for answers takes her from nineteenth-century New York City dogfighting pits, the cruelty of which drew the attention of the recently formed ASPCA, to early twentieth-century movie sets where pit bulls cavorted with Fatty Arbuckle and Buster Keaton, from the battlefields of Gettysburg and the Marne, where pit bulls earned presidential recognition, to desolate urban neighborhoods where the dogs were loved, prized, and sometimes brutalized. Whether through love or fear, hatred or devotion, humans are bound to the history of the pit bull. With unfailing thoughtfulness, compassion, and a firm grasp of scientific fact, Dickey offers us a clear-eyed portrait of this extraordinary breed and an insightful view of Americans' relationship with their dogs. *The Windsor Magazine*, 1899 **Change That Law Jo**
