Schwartz,Shinji Takagi,2017-06-30 This volume book brings together nine background papers prepared for an evaluation by the IMF Independent Evaluation Office of the IMF and the crises in Greece Ireland and Portugal It presents an authoritative work on the evolving relationship between the IMF and the euro area a common currency area founded in 1999 consisting of advanced highly integrated economies in Europe The euro area or any common currency area for that matter has posed challenges to the IMF s operational activities as its Articles of Agreement contain no provision for joint membership The challenges became intense when a series of crises erupted in Greece Ireland and Portugal from 2009 to 2011 and the Fund was called upon to help intervene by offering its financing and crisis management expertise The IMF found itself in uncharted territory where there was no precedent or established procedure The chapters many of which are prepared by prominent academics and former senior IMF officials who are thoroughly familiar with internal procedures discuss various aspects of the IMF s engagement with the euro area including precrisis surveillance how key decisions were made how the IMF collaborated with European institutions and how it designed and implemented its lending programs with the three crisis countries The book gives prominence to governance related issues given the large voting share of more than 20 percent within the IMF of euro area members and the subsequent public perception that the IMF treated the euro area more favorably than it does developing and emerging market members The approaches are both cross cutting and country based

Strategically important metals Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-05-17 Although most strategic metal reserves are unlikely to run out over the coming decades the perception of scarcity of certain minerals and metals may lead to increased speculation and volatility in price and supply Strategically important metals are vital to advanced manufacturing low carbon technologies and other growing industries and the Government should provide reliable information on potential resource risks in a coordinated and coherent way The UK also exports large quantities of scrap metal and waste electrical and electronic equipment WEEE often to developing countries This metal not only is a potential resource for the UK but it is also an example of the UK exporting its environmental problems elsewhere There are also concerns about the illegal export of WEEE which is often labelled as second hand equipment for re use and calls for safeguards to be put in place Despite a rate of 90% by weight metal recycling in the UK it is of great concern that some strategic metals are likely to be lost in the 10% not being recycled The report recommends Improving existing legislation to ensure companies implement requirements on reporting non financial information such as human rights and health and safety issues an evaluation by the Government of the potential for introducing similar legislation to that in the US whereby companies are required to produce detailed reports on conflict minerals that they use This report also brings the alleged activities of large dealers on the London Metals Exchange to the attention of the Office of Fair Trading Finally the report looks at domestic extraction and says planning regulations should not unnecessarily restrict the use of significant potential reserves and that domestic mining could alleviate risks associated with sourcing metals from external supply monopolies In parallel the Government has to invest in research to ensure that future domestic mining has the least possible environmental impact
