Predicted Paper 1 November 2014:

Postapocalyptic Fantasies in Antebellum American Literature John Hay, 2017-10-05 Even before the Civil War American writers were imagining life after a massive global catastrophe For many the blank slate of the American continent was instead a wreckage strewn wasteland a new world in ruins Bringing together epic and lyric poems fictional tales travel narratives and scientific texts *Postapocalyptic Fantasies in Antebellum American Literature* reveals that US authors who enthusiastically celebrated the myths of primeval wilderness and virgin land also frequently resorted to speculations about the annihilation of civilizations past and future By examining such postapocalyptic fantasies this study recovers an antebellum rhetoric untethered to claims for historical exceptionalism a patriotic rhetoric that celebrates America while denying the United States a unique position outside of world history As the scientific field of natural history produced new theories regarding biological extinction geological transformation and environmental collapse American writers responded with wild visions of the ancient past and the distant future *The Will to Predict* Eglė Rindzevičiūtė, 2023-05-15 In *The Will to Predict* Eglė Rindzevičiūtė demonstrates how the logic of scientific expertise cannot be properly understood without knowing the conceptual and institutional history of scientific prediction She notes that predictions of future population economic growth environmental change and scientific and technological innovation have shaped much of twentieth and twenty first century politics and social life as well as government policies Today such predictions are more necessary than ever as the world undergoes dramatic environmental political and technological change But she asks what does it mean to predict scientifically What are the limits of scientific prediction and what are its effects on governance institutions and society Her intellectual and political history of scientific prediction takes as its example twentieth century USSR By outlining the role of prediction in a range of governmental contexts from economic and social planning to military strategy she shows that the history of scientific prediction is a transnational one part of the history of modern science and technology as well as governance Going beyond the Soviet case Rindzevičiūtė argues that scientific predictions are central for organizing uncertainty through the orchestration of knowledge and action Bridging the fields of political sociology organization studies and history *The Will to Predict* considers what makes knowledge scientific and how such knowledge has impacted late modern governance *Advances in Latent Variables* Maurizio Carpita, Eugenio Brentari, El Mostafa Qannari, 2015-04-01 The book belonging to the series *Studies in Theoretical and Applied Statistics Selected Papers from the Statistical Societies* presents a peer reviewed selection of contributions on relevant topics organized by the editors on the occasion of the SIS 2013 Statistical Conference *Advances in Latent Variables Methods Models and Applications* held at the Department of Economics and Management of the University of Brescia from June 19 to 21 2013 The focus of the book is on advances in statistical methods for analyses with latent variables In fact in recent years there has been increasing interest in this broad research area from both a theoretical and an applied point of view as the statistical latent variable approach allows the effective

modeling of complex real life phenomena in a wide range of research fields A major goal of the volume is to bring together articles written by statisticians from different research fields which present different approaches and experiences related to the analysis of unobservable variables and the study of the relationships between them Electronic Commerce Efraim Turban,David King,Jae Kyu Lee,Ting-Peng Liang,Deborrah C. Turban,2015-01-29 Throughout the book theoretical foundations necessary for understanding Electronic Commerce EC are presented ranging from consumer behavior to the economic theory of competition Furthermore this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields including a senior vice president of an e commerce related company The authors provide website resources numerous exercises and extensive references to supplement the theoretical presentations At the end of each chapter a list of online resources with links to the websites is also provided Additionally extensive vivid examples from large corporations small businesses from different industries and services governments and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce These examples which were collected by both academicians and practitioners show the reader the capabilities of EC its cost and justification and the innovative ways corporations are using EC in their operations In this edition previous editions published by Pearson Prentice Hall the authors bring forth the latest trends in e commerce including social businesses social networking social collaboration innovations and mobility *Power and Energy* Richard Kong,2015-05-06 Power and Energy contains 86 selected papers from the International Conference on Power and Energy CPE 2014 Shanghai China 29 30 November 2014 and presents a wide range of topics Energy management planning and policy making Energy technologies and environment Energy prospects Conventional and renewable power generation Power system man *Networked Systems* Parosh Aziz Abdulla,Carole Delporte-Gallet,2016-09-14 This book constitutes the refereed post proceedings of the 4th International Conference on Networked Systems NETYS 2016 held in Marrakech Morocco in May 2016 The 22 full papers and 11 short papers presented together with 19 poster abstracts were carefully reviewed and selected from 121 submissions They report on best practices and novel algorithms results and techniques on networked systems and cover topics such as multi core architectures concurrent and distributed algorithms parallel concurrent distributed programming distributed databases cloud systems networks security and formal verification From Social Data Mining and Analysis to Prediction and Community Detection Mehmet Kaya,Özcan Erdoğan,Jon Rokne,2017-03-21 This book presents the state of the art in various aspects of analysis and mining of online social networks Within the broader context of online social networks it focuses on important and upcoming topics of social network analysis and mining such as the latest in sentiment trends research and a variety of techniques for community detection and analysis The book collects chapters that are expanded versions of the best papers presented at the IEEE ACM International Conference on Advances in Social Networks Analysis and Mining ASONAM 2015 which was held in Paris France in August 2015 All papers have been peer reviewed and checked carefully for overlap with the literature The

book will appeal to students and researchers in social network analysis mining and machine learning

Macro-Level Learning through Massive Open Online Courses (MOOCs): Strategies and Predictions for the Future McKay, Elspeth,Lenarcic, John,2015-03-31 To some in academia Massive Open Online Courses are a paradigm shift in online education while others perceive them as a threat to traditional styles of pedagogy In this regard the time honored model of the university lecture is seen as being a potential casualty of the rise of MOOCs Macro Level Learning through Massive Open Online Courses MOOCs Strategies and Predictions for the Future provides insight into the emerging phenomenon of MOOCs as a design manual for the course designer with a collection of chapters that deal with all facets of the MOOC debate Industry training developers corporate trainers educators post graduate students and others will benefit from the information provided in this book

Sports Materials Thomas Allen,Leon Foster,Martin Strangwood,JamesWebster,2020-01-24 Advances in materials are crucial to the development of sports equipment from tennis rackets to skis to running shoes Materials driven improvements in equipment have helped athletes perform better while enhancing safety and making sport more accessible and enjoyable This book brings together a collection of 10 papers on the topic of sports materials as published in a Special Issue of Applied Sciences The papers within this book cover a range of sports including golf tennis table tennis and baseball State of the art engineering techniques such as finite element modelling impact testing and full field strain measurement are applied to help further our understanding of sports equipment mechanics and the role of materials with a view to improving performance enhancing safety and facilitating informed regulatory decision making The book also includes papers that describe emerging and novel materials including auxetic materials with their negative Poisson s ratio fattening when stretched and knits made of bamboo charcoal This collection of papers should serve as a useful resource for sports engineers working in both academia and industry as well as engineering students who are interested in sports equipment and materials

Perspectives on Earthquake Geotechnical Engineering Atilla Ansal,Mohamed Sakr,2015-04-15 This book offers a broad perspective on important topics in earthquake geotechnical engineering and gives specialists and those that are involved with research and application a more comprehensive understanding about the various topics Consisting of eighteen chapters written by authors

from the most seismic active regions of the world such as USA Japan Canada Chile Italy Greece Portugal Taiwan and Turkey the book reflects different views concerning how to assess and minimize earthquake damage The authors a prominent group of specialists in the field of earthquake geotechnical engineering are the invited lecturers of the International Conference on Earthquake Geotechnical Engineering from Case History to Practice in the honour of Professor Kenji Ishihara held in Istanbul Turkey during 17-19 June 2013

Heavy Oil Recovery and Upgrading James G. Speight, 2019-03-05 Heavy Oil Recovery and Upgrading covers properties factors methods and all current and upcoming processes giving engineers new and experienced the full spectrum of recovery choices including SAGD horizontal well technology and hybrid approaches Moving on to the upgrading and refining of the product the book also includes information on in situ upgrading refining options and hydrogen production Rounding out with environmental effects management methods on refinery waste and the possible future configurations within the refinery this book provides engineers with a single source to make decisions and manage the full range of challenges

Origination Andy Pike, 2015-03-24 Origination The Geographies of Brands and Branding offers innovative theoretical and conceptual frameworks relating to the ways that actors create meaning and value in commodity brands and branding through processes of geographical association Provides innovative conceptualization and theorization to facilitate an understanding of the geographical dimensions of brands and branding Challenges current interpretations of brands as vehicles of homogenization in globalization Establishes the theoretical and conceptual foundations of a more geographically sensitive approach through rigorous empirical examination of the under researched geographical differentiation of commodity brands and branding Presents innovative new research and analysis of the socio spatial biographies of the Newcastle Brown Ale Burberry and Apple brands Forges strong new connections between political and cultural economy approaches within geography Provides a distinctive and incisive conceptual and theoretical framework capable of engaging other branded commodities and their branding in other times and places

The Euro Experiment Paul Wallace, 2016 A clear analytical and balanced guide to the euro experiment and subsequent crisis that will appeal to a wide readership

Applied Spatial Modelling and Planning John R. Lombard, Eliahu Stern, Graham Clarke, 2016-10-04 This book highlights the extraordinary range of areas to which geographical analysis and spatial modelling can bring lessons and insights It shows how these techniques have been used to address real world issues that are of concern to international organisations public agencies and businesses as illustrated by actual funded projects that geographers have developed collaboratively with end users Applied Spatial Modelling and Planning shows how much geographical research is policy relevant to a wide variety of agencies through the use of GIS and spatial modelling in applied geography The book's chapters contain a cross section of innovative applications and approaches to problem solving within five major domains of the dynamics of economic space housing and settlements population movements and population ageing health care and the environment Using a number of case studies on the use of GIS and spatial modelling this book demonstrates the fact that

much of what is done by quantitative geographers is not only relevant within academia but also has use in policy work This book will appeal to an international audience interested in cutting edge spatial modelling to better understand the processes involved in solving real problems

The Changing Faces of Glutathione, a Cellular Protagonist Alfonso Pompella, Alessandro Corti, 2015-07-17

Glutathione GSH has been described for a long time just as a defensive reagent against the action of toxic xenobiotics drugs pollutants carcinogens both directly and as a cofactor for GSH transferases As a prototype antioxidant it has been involved in cell protection from the noxious effect of excess oxidant stress both directly and as a cofactor of glutathione peroxidases In addition it has long been known that GSH is capable of forming disulfide bonds with cysteine residues of proteins and the relevance of this mechanism S glutathionylation in regulation of protein function has been well documented in a number of research fields Rather paradoxically it has also been highlighted that GSH and notably its catabolites as originated by metabolism by gamma glutamyltransferase can promote oxidative processes by participating in metal ion mediated reactions eventually leading to formation of reactive oxygen species and free radicals Also a fundamental role of GSH has been recognized in the storage and transport of nitric oxide NO in the form of S nitrosoglutathione GSNO The significance of GSH as a major factor in regulation of cell life proliferation and death can be regarded as the integrated result of all these roles as well as of more which are emerging in diverse fields of biology and pathophysiology Against this background modulation of GSH levels and GSH related enzyme activities represents a fertile field for experimental pharmacology in numerous and diverse perspectives of animal plant and microbiologic research This research topic includes 14 articles i e 4 Opinion Articles 6 Reviews and 4 Original Research Articles The contributions by several distinguished research groups each from his own standpoint of competence and expertise provide a comprehensive and updated view over the diverse roles the changing faces of GSH and GSH related enzymes in cell s health disease and death

The Emerging Discipline of Quantitative Systems Pharmacology Tarek A. Leil, Sergey Ermakov, 2015-09-07

In 2011 the National Institutes of Health NIH in collaboration with leaders from the pharmaceutical industry and the academic community published a white paper describing the emerging discipline of Quantitative Systems Pharmacology QSP and recommended the establishment of NIH supported interdisciplinary research and training programs for QSP QSP is still in its infancy but has tremendous potential to change the way we approach biomedical research QSP is really the integration of two disciplines that have been increasingly useful in biomedical research Systems Biology and Quantitative Pharmacology Systems Biology is the field of biomedical research that seeks to understand the relationships between genes and biologically active molecules to develop qualitative models of these systems and Quantitative Pharmacology is the field of biomedical research that seeks to use computer aided modeling and simulation to increase our understanding of the pharmacokinetics PK and pharmacodynamics PD of drugs and to aid in the design of pre clinical and clinical experiments The purpose of QSP modeling is to develop quantitative computer models of biological systems and disease processes and the effects of drug PK and PD on those

systems QSP models allow testing of numerous potential experiments in silico to eliminate those associated with a low probability of success avoiding the potential costs of evaluating all of those failed experiments in the real world At the same time QSP models allow us to develop our understanding of the interaction between drugs and biological systems in a more systematic and rigorous manner As the need to be more cost efficient in the use of research funding increases biomedical researchers will be required to gain the maximum insight from each experiment that is conducted This need is even more acute in the pharmaceutical industry where there is tremendous competition to develop innovative therapies in a highly regulated environment combined with very high research and development R a lack of adequate graduate training programs and the lack of support from government agencies that fund biomedical research However there is an active community of researchers in the pharmaceutical industry the academic community and government agencies that develop QSP and quantitative systems biology models and apply them both to better characterize and predict drug pharmacology and disease processes as well as to improve efficiency and productivity in pharmaceutical R D *Made to Order* Margaret E.

Derry,2022-03-01 Animal breeding has been complicated by persisting factors across species cultures geography and time In *Made to Order* Margaret E Derry explains these factors and other breeding concerns in relation to both animals and society in North America and Europe over the past three centuries *Made to Order* addresses how breeding methodology evolved what characterized the aims of breeding and the way structures were put in place to regulate the occupation Illustrated by case studies on important farm animals and companion species the book presents a synthetic overview of livestock breeding as a whole It gives considerable emphasis to genetics and animal breeding in the post 1960 period the relationship between environmental and improvement breeding and regulation of breeding as seen through pedigrees In doing so *Made to Order* shows how studying the ancient human practice of animal breeding can illuminate the ways in which human thinking theorizing and evolving characterize our interactions with all natural processes *Computational Intelligence in*

Photovoltaic Systems Emanuele Ogliari,Sonia Leva,2019-09-05 Photovoltaics among the different renewable energy sources RES has become more popular In recent years however many research topics have arisen as a result of the problems that are constantly faced in smart grid and microgrid operations such as forecasting of the output of power plant production storage sizing modeling and control optimization of photovoltaic systems Computational intelligence algorithms evolutionary optimization neural networks fuzzy logic etc have become more and more popular as alternative approaches to conventional techniques for solving problems such as modeling identification optimization availability prediction forecasting sizing and control of stand alone grid connected and hybrid photovoltaic systems This Special Issue will investigate the most recent developments and research on solar power systems This Special Issue *Computational Intelligence in Photovoltaic Systems* is highly recommended for readers with an interest in the various aspects of solar power systems and includes 10 original research papers covering relevant progress in the following non exhaustive fields Forecasting techniques deterministic

stochastic etc DC AC converter control and maximum power point tracking techniques Sizing and optimization of photovoltaic system components Photovoltaics modeling and parameter estimation Maintenance and reliability modeling Decision processes for grid operators *Wind Energy for Power Generation* K. R. Rao, 2019-10-17 This far reaching resource covers a full spectrum of multi faceted considerations critical for energy generation decision makers considering the adoption or expansion of wind power facilities It contextualizes pivotal technical information within the real complexities of economic environmental practical and socio economic parameters This matrix of coverage includes case studies and analysis from developed and developing regions including North America and Europe Asia Latin America the Middle East and Africa Crucial issues to power generation professionals and utilities such as capacity credits fuel saving intermittency penetration limits relative cost of electricity by generation source growth and cost trends incentives and wind integration issues are addressed Other economic issues succinctly discussed inform financial commitment to a project including investment matrices strategies for economic evaluations econometrics of wind energy cost comparisons of various investment strategies and cost comparisons with other energy sources Due to its encompassing scope this reference will be of distinct interest to practicing engineers policy and decision makers project planners investors and students working in the area of wind energy for power generation
