ETAPS 2002 was the fifth instance of the European Joint Conferences on Theory and Practice of Software. ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences. This year it comprised 5 conferences: FOSSACS, FASE, ESOP, CC, TACAS, 13 satellite workshops, ACL2, AGT, CMCS, COCV, DCC, INT, LDFA, SC, SFEDL, SLAP, SPIN, TPTS, and VISS. 8 invited lectures not including those specific to the satellite events and several tutorials. The events that comprise ETAPS address various aspects of the system development process including specification, design, implementation, analysis, and improvement. The languages, methodologies, and tools which support these activities are all well within its scope. Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on one hand and soundly based practice on the other. Many of the issues involved in software design apply to systems in general, including hardware systems, and the emphasis on software is not intended to be exclusive.
