Toward Modern Science Robert Monroe Palter,1961 Toward Modern Science Robert M. Palter,1969 *Man and Nature in the Renaissance* Allen George Debus,1978-10-31 Man and Nature in the Renaissance offers an introduction to science and medicine during the earlier phases of the scientific revolution from the mid fifteenth century to the mid seventeenth century Renaissance science has frequently been approached in terms of the progress of the exact sciences of mathematics and astronomy to the neglect of the broader intellectual context of the period Conversely those authors who have emphasized the latter frequently play down the importance of the technical scientific developments In this book Professor Debus amalgamates these approaches The exact sciences of the period are discussed in detail but reference is constantly made to religious and philosophical concepts that play little part in the science of our own time Thus the renewed interest in mystical texts and the subsequent impact of alchemy astrology and natural magic on the development of modern science and medicine are central to the account Major themes that are followed throughout the book include the effects of

humanism the search for a new method of science and the dialogue between proponents of the mystical occult world view
and the mathematical observational approach to nature The Scientific Renaissance Marie Boas,1962 **Rise of Modern
