the most wrenching sacrifice of all **Art Nexus** ,2002 *Cellular Obsession: How Smartphones, and the Internet of Things Are Going to Change Your Life* Nick Vulich,2017-08-06 Mobile Will Change Everything Again George Orwell s paranoid vision of 1984 is here Only it isn t Big Brother who is watching us It s Big Data Here s the deal Google Apple and Microsoft are all attempting to do the same thing They are trying to get your device to learn enough about you so it can anticipate what you want to do next and provide the appropriate information just as you need it Rafe Needleman described it best in an article he authored for Yahoo Tech He said artificial intelligence will be somewhat like auto correct Your smartphone will auto suggest what you should do next based on your history To do that your smartphone would draw on your prior browsing history and what it knows about you from your GPS location services your text messages and your emails The hard part is getting your phone to think contextually As human beings we can put things in context based on what s happening now For example let s say you are sitting in your house You smell something burning and see smoke coming from the kitchen The next thing you know the smoke alarm goes off Most people can put two and two together to determine something is wrong They understand that maybe the house is on fire A normal person is either going to check it out or dial 9 1 1 and run out of the house screaming fire Here s a tougher one Let s say you have an appointment set to replace your windshield at 9 15 The Glass Barn texts you to say they are running an hour behind schedule Is that okay Or would you like to reschedule That text is buried among several other messages Most of them are junk A coupon for a dollar off a sandwich free drinks at the bar down the street and a contest entry Which messages should your phone hide or display Most people would say the message from the Glass Barn should be displayed first because it s more urgent But how do you teach a chunk of metal and memory chips to make that decision That s the real challenge When contextual intelligence works it s amazing The problem is that right now your phone gets it right less than a third of the time Google is working hard to improve on that number Their future depends on getting it right Time Magazine ran an article by Victor Lukerson a while back titled Google Searches for Its Future The premise was it s a whole new world out there Google became the go to search engine because of their excellence in desktop search but mobile has changed everything If Google wants to survive they need to reinvent themselves The future is mobile and Google has determined the only way they can survive in this new reality is to focus in on voice search and Google Now Want to know more Buy the book Lean why cellular is the future of everything *The Hidden Power* Josh Coker,2022-06-25 This isn t treasure hunting this is astro archeology The quest for power begins A power vacuum exists in the galaxy Ambition deception and corruption have led to mistrust among several alien races Despite the United Planetary Council s efforts to keep the old alliances intact several factions have broken off Nevertheless Allegiant Space is still home to most of the human race Professor Soren Stallard an ex military officer teaches college students by day and explores ancient ruins by night After serving in the Cyberwars he wants nothing more than to live a simple life But after receiving word that a family member has gone missing while searching for a lost artifact Soren travels to Frontier Space in

search of clues Little does he know there are dangerous entities working in secret trying to prevent him from finding answers and they will stop at nothing to keep the truth hidden Within this space opera action adventure you ll find spaceships futuristic weapons engaging characters and alien races Not to mention secret societies ancient ruins mystical energies and MUCH MUCH MORE Join the fun and get your copy today

Hardrada: The Last Viking Gaurav Garg, He lost a kingdom at fifteen He would burn the world to get it back For the young Prince Harald Sigurdsson the bloody mud of Stiklestad was not an end but a brutal beginning Exiled wounded and hunted after the death of his brother King Olaf he is stripped of his home his title and his honor With nothing but his royal blood and a heart filled with a cold simmering rage he walks the ghost s road east to the court of Kievan Rus and then south to the glittering treacherous heart of the known world Constantinople In the service of the Byzantine Emperor he finds his true calling He enlists in the elite Varangian Guard and through years of relentless medieval warfare he forges a new identity On the pirate coasts of the Mediterranean the sun scorched plains of Asia Minor and the blood soaked hills of Bulgaria he becomes a legend the Bulgar Burner the Thunderbolt of the North a commander whose tactical genius is matched only by his unflinching cruelty He learns the language of power not in councils but in sieges not in treaties but in terror Amassing a king s ransom in gold he is ready to return home But the Norway he returns to is not the one he left The throne is occupied by his own nephew the pious Magnus the Good Through a campaign of fear and a pragmatic cold blooded betrayal Harald seizes a share of the crown his ambition finally tasting the power it has craved When Magnus dies leaving Harald as the sole undisputed king his gaze turns to the ultimate prize In the year 1066 with the English throne suddenly vacant he sees his destiny Forging an unholy alliance with the exiled brother of the new English king he assembles the greatest Viking invasion fleet of the age to claim the richest kingdom in the north This is his final epic gamble This is the story of the last great Viking king a true and brutal Viking saga of an antihero s relentless rise and his final catastrophic fall at the fateful Battle of Stamford Bridge the bloody day that forever marked the end of an era
