served as a validation of many of Saudi Arabia's internal reforms. It also created massive opportunities for some of the nation's up and coming businesses. In this 246 page publication we show how technology completely changed the Kingdom during the pandemic. Things will never be the same. It covers finance, payments and fintech, IT and digitalization, industry, water and energy, aviation and defense, transport and logistics, construction and real estate, agriculture, health, education and tourism.

The Report: Saudi Arabia 2018, Key initiatives include a privatisation programme which would see the divestment of a number of state owned giants such as the partial listing of Aramco, the creation of the world's largest sovereign wealth fund and the increased participation of women in the job market. The Kingdom has played a key role too on the international stage in 2017 becoming the first country to host President Trump, a visit which resulted in renewed trade and investment commitments on both sides. Meanwhile the country's importance as a trading hub continues to grow thanks to both the various infrastructural upgrades that are taking place to its ports and airports as well as its geographical advantage as a connector of three continents and its proximity to the Red Sea through which 10% of world trade travels.

The Report: Saudi Arabia 2015 Oxford Business Group, 2015-09-22. While Saudi Arabia's economy remains dominated by its hydrocarbons sector, several other sectors have emerged in recent years as key propellers of economic growth. The Kingdom's financial services industries have continued to expand steadily despite the liquidity challenges posed by falling oil prices. Trade and investment are being treated as key priorities as the government looks to negotiate this altered economic landscape, aiming to leverage its large population, high per capita income and many sea and air links. The country's capital markets sector meanwhile is poised for a period of significant growth on the back of the opening of Tadawul to international investors in 2015 and the raft of regulatory upgrades implemented as a result. The domestic insurance industry which remains dominated by the motor and medical segments has enjoyed double digit growth over the past five years in both revenue and net profit. Elsewhere the targets outlined in Vision 2030 indicate that a period of greater opportunity and integration is on the horizon for private players operating in core sectors such as health care, utilities, industry and ICT.
