Contestation in Prism Flavia Lucenti,Cecilia Ducci,Carmen Wunderlich,Jeffrey S. Lantis,2025-04-30 This book analyses the complex dynamics of international norm contestation and explores how norms adapt and withstand challenges in different settings Examining the interplay between various types of contestation norm robustness and the resilience of norm clusters it sheds light on what the authors define as contestation in prism The book thus presents norm contestation as a multifaceted process with far reaching implications In this context it further discusses different conceptions of contestation ranging from reactive vs proactive contestation and applicatory vs validity contestation

to inadvertent i.e. interpretive vs deliberate contestation. It then develops a theoretical model that links contestation in prism with studies of norm clusters or norms that are embedded in broader normative structures and interwoven with other normative meanings. Based on a strong theoretical framing, the book presents in depth analyses of norm contestation in areas such as regional organizations, nuclear non-proliferation norms relating to atrocities and international criminal law. Offering multifaceted perspectives on norm evolutions and their implications, this contribution will appeal to students, scholars and researchers of international relations and related disciplines as well as policy makers interested in a better understanding of contestation and norm cluster resiliency. **Research Handbook on Mediating International Crises** Jonathan

Wilkenfeld, Kyle Beardsley, David Quinn, 2019. Current conceptions of mediation can often fail to capture the complexity and intricacy of modern conflicts. This Research Handbook addresses this problem by presenting the leading expert opinions on international mediation, examining how international mediation practices, mechanisms and institutions should adapt to the changing characteristics of contemporary international crises. *Small States in a Shifting International Order* Kristen P. Williams, Steven E. Lobell, Neal G. Jesse, 2025. This manuscript is about how small states pursue their security in a world of power asymmetries and a shifting international order. While small states are defined as weaker actors in the international system, today's changing world also provides them with opportunities and more agency in terms of their foreign policies, particularly within their regions. The international group of contributors to this volume show that small states' foreign policies go beyond traditional explanations of bandwagoning with or balancing against great powers. The countries examined include the Baltic states, Costa Rica, Denmark, Ghana, Jordan, Nepal, Senegal and Sweden. Provided by publisher. *Religion, State and the United Nations* Anne Stensvold, 2016-07-22. This volume approaches the UN as a laboratory of religious political value politics. Over the last two decades, religion has acquired increasing influence in international politics and religious violence and terrorism has attracted much scholarly attention. But there is another parallel development which has gone largely unnoticed, namely the increasing political impact of peaceful religious actors. With several religious actors in one place and interacting under the same conditions, the UN is as a multi-religious society writ small. The contributors to this book analyse the most influential religious actors at the UN, including The Roman Catholic Church, The Organisation of Islamic Countries, the Russian Orthodox Church. Mapping the peaceful political engagements of religious actors, who they are and how they collaborate with each other, whether on an ad hoc basis or by forming more permanent networks, throwing light at the modus operandi of religious actors at the UN, their strategies and motivations. The chapters are closely interrelated through the shared focus on the UN and common theoretical perspectives and pursue two intertwined aspects of religious value politics, namely the whys and hows of cross-religious cooperation on the one hand and the interaction between religious actors and states on the other. Drawing together a broad range of experts on religious actors, this work will be of great interest to students and scholars of Religion and Politics, International Relations and the UN.
