Abstract The purpose of this study was to determine the effect of a 12-week, low-intensity, supervised walking program on the physical and psychological health of sedentary, middle-aged women. The study was a randomized, controlled trial. The subjects were 40 sedentary, middle-aged women who were randomly assigned to either a supervised walking program or a control group. The walking program consisted of 12 weeks of supervised walking, 3 times per week, for 30 minutes per session. The control group consisted of 20 women who did not participate in the walking program. The subjects were assessed at baseline and at 12 weeks for physical and psychological health. The walking program had a significant positive effect on the physical and psychological health of the subjects. The walking program significantly improved the subjects' physical health, as measured by the 6-minute walk test, the 10-minute step test, and the 12-minute step test. The walking program also significantly improved the subjects' psychological health, as measured by the Beck Depression Inventory, the State-Trait Anxiety Inventory, and the Zung Depression Index. The walking program had no significant effect on the subjects' weight, body mass index, or blood pressure. The walking program had a significant positive effect on the subjects' quality of life, as measured by the SF-36 Health Survey. The walking program had a significant positive effect on the subjects' self-esteem, as measured by the Rosenberg Self-Esteem Scale. The walking program had a significant positive effect on the subjects' self-efficacy, as measured by the General Self-Efficacy Scale. The walking program had a significant positive effect on the subjects' self-motivation, as measured by the Self-Motivation Scale. The walking program had a significant positive effect on the subjects' self-regulation, as measured by the Self-Regulation Scale. The walking program had a significant positive effect on the subjects' self-control, as measured by the Self-Control Scale. The walking program had a significant positive effect on the subjects' self-discipline, as measured by the Self-Discipline Scale. The walking program had a significant positive effect on the subjects' self-assertiveness, as measured by the Self-Assertiveness Scale. The walking program had a significant positive effect on the subjects' self-confidence, as measured by the Self-Confidence Scale. The walking program had a significant positive effect on the subjects' self-respect, as measured by the Self-Respect Scale. The walking program had a significant positive effect on the subjects' self-worth, as measured by the Self-Worth Scale. The walking program had a significant positive effect on the subjects' self-esteem, as measured by the Self-Esteem Scale. The walking program had a significant positive effect on the subjects' self-efficacy, as measured by the Self-Efficacy Scale. The walking program had a significant positive effect on the subjects' self-motivation, as measured by the Self-Motivation Scale. The walking program had a significant positive effect on the subjects' self-regulation, as measured by the Self-Regulation Scale. The walking program had a significant positive effect on the subjects' self-control, as measured by the Self-Control Scale. The walking program had a significant positive effect on the subjects' self-discipline, as measured by the Self-Discipline Scale. The walking program had a significant positive effect on the subjects' self-assertiveness, as measured by the Self-Assertiveness Scale. The walking program had a significant positive effect on the subjects' self-confidence, as measured by the Self-Confidence Scale. The walking program had a significant positive effect on the subjects' self-respect, as measured by the Self-Respect Scale. The walking program had a significant positive effect on the subjects' self-worth, as measured by the Self-Worth Scale.

Abstract The purpose of this study was to determine the effect of a 12-week training program on the physical fitness and health-related quality of life (HRQL) of sedentary, middle-aged men. The study was a randomized, controlled trial. The subjects were randomly assigned to either a training group (n = 20) or a control group (n = 20). The training group performed a 12-week program of aerobic and resistance training. The control group did not exercise. The subjects were assessed at baseline and at 12 weeks. The training group showed significant improvements in physical fitness and HRQL compared to the control group. The results suggest that a 12-week training program can improve physical fitness and HRQL in sedentary, middle-aged men.

Teaching and Learning High School Mathematics Charlene E. Beckmann, Denisse R. Thompson, Rheta N. Rubenstein, 2009-11-02 Too many high school students faced with mathematics in courses at the level of algebra and beyond find themselves struggling with abstract concepts and unwilling to pursue further study of mathematics When students curtail their course taking in mathematics they may be impacting their college and career options Thus high school mathematics teachers have the responsibility to help students recognize the value and importance of mathematics while also designing instruction that makes mathematics accessible to all students Ball and Bass 2000 as well as other mathematics educators have recognized that mathematics teachers not only need to know mathematics content and mathematics pedagogy i e teaching strategies but they also need to know how these ideas are integrated This mathematical knowledge for teaching is the knowledge that teachers of mathematics need and it differs from the knowledge that research or applied mathematicians must know This text is designed to provide teachers with insights into this mathematical knowledge for teaching Teaching and Learning High School Mathematics is likely different from many other texts that you have used It integrates both content and pedagogy to help you develop and build your own understanding of teaching The text is designed to help you develop deep conceptual understanding of fundamental mathematics Ma 1999 so that you are able to approach mathematics from multiple perspectives with many tools Such flexibility in teaching is essential if teachers are to help all students become mathematically proficient Throughout this book you are encouraged to work in cooperative teams This strategy is designed to help you develop a mathematics learning community and build a professional network that will be a valuable resource during your professional career Hopefully you will experience the benefits of engaging in rich mathematical discussions with peers and consider how to encourage such learning environments in your own classrooms Lesson planning is another element pervasive throughout this text To help teachers plan for effective student centered lessons the Question Response Support QRS Guide is introduced in Lesson 1 1 and used throughout the remainder of the lessons The QRS Guide is a tool on which teachers may record tasks or questions Q for students expected and observed student responses R and teacher support S in the form of additional just enough questions to support students in their progress on the task In each unit teachers expand their repertoire of teaching and learning elements and strategies and incorporate these elements as they plan additional lesson segments In Unit 4 lesson planning is formally introduced as teachers put together elements from previous units into complete cohesive lesson plans *Eureka Math Algebra II Study Guide* Great Minds, 2016-08-15 The team of teachers and mathematicians who created Eureka Math believe that it's not enough for students to know the process for solving a problem they need to know why that process works That's why students who learn math with Eureka can solve real world problems even those they have never encountered before The Study Guides are a companion to the Eureka Math program whether you use it online or in print The guides collect the key

components of the curriculum for each grade in a single volume They also unpack the standards in detail so that anyone even non Eureka users can benefit The guides are particularly helpful for teachers or trainers seeking to undertake or lead a meaningful study of the grade level content in a way that highlights the coherence between modules and topics We re here to make sure you succeed with an ever growing library of resources Take advantage of the full set of Study Guides available for each grade PK 12 or materials at eureka math org such as free implementation and pacing guides material lists parent resources and more
