Prentice Hall America James West Davidson, 2009 **America: History of Our Nation** James West Davidson, Michael B. Staff, *Remembering Reconstruction* Carole Emberton, Bruce E. Baker, 2017-04-12 Academic studies of the Civil War and historical memory abound ensuring a deeper understanding of how the war's meaning has shifted over time and the implications of those changes for concepts of race citizenship and nationhood The Reconstruction era by contrast has yet to receive similar attention from scholars Remembering Reconstruction ably fills this void assembling a prestigious lineup of Reconstruction historians to examine the competing social and historical memories of this pivotal and violent period in American history Many consider the period from 1863 beginning with slave emancipation to 1877 when the last federal troops were withdrawn from South Carolina and Louisiana an unfinished revolution for civil rights racial identity formation and social reform Despite the cataclysmic aftermath of the war the memory of Reconstruction in American consciousness and its impact on the country's fraught history of identity race and reparation has been largely neglected The essays in Remembering Reconstruction advance and broaden our perceptions of the complex revisions in the nation's collective memory Notably the authors uncover the impetus behind the creation of black counter memories of Reconstruction and the narrative of the tragic era that dominated white memory of the period Furthermore by questioning how Americans have remembered Reconstruction and how those memories have shaped the nation's social and political history throughout the twentieth century this volume places memory at the heart of historical inquiry **Schoolbook Nation** Joseph Moreau, 2010-02-22 A superior book Many readers will be surprised to see that today's arguments about history education follow the culture wars that go back to almost the beginning of the republic Moreau's writing is engaging with brilliant flashes of insight as well as balance and wit Gary B Nash Director of the National Center for History in the Schools Taking Frances FitzGerald's textbook study *America Revised* as a point of departure Joseph Moreau in *Schoolbook Nation* challenges FitzGerald's premise that the 1960s were the beginning of the end of the glory days of American history education Moreau recounts how in the late twentieth century cultural commentators such as historian Arthur Schlesinger Jr and politician Newt Gingrich preached that a new identity crisis had shaken American history in the sixties and that the grand unified view of our past had given way to various interest groups who dismantled the old national narrative while demanding a more inclusive curriculum for their children Moreau discovered however that American history while grand has never been unified Delving into more than 100 history books from the last 150 years the author reveals that the efforts of pressure groups to influence the history curriculum are nearly as old as the mustiest textbook For those who would influence textbooks and teaching Protestant elites in the 1870s Irish Americans in the 1920s and conservative politicians today the sky has always been falling according to Moreau *Schoolbook Nation* offers a history lesson of its own when the story of the past is written or rewritten truth is often a victim With its comprehensive treatment of the subjects of honesty and politics in the teaching of history this

is an essential book on the side of truth in a complex debate *Making Connections Low Intermediate Student's Book*
Jessica Williams,Daphne Mackey,2011-02-21 Comprehensive course introducing academic texts on high interest topics with
advice on reading strategies and vocabulary building skills With Teacher s Manual featuring answer key and teaching
suggestions for the activities Suitable for self study building vocabulary and developing reading writing and study skills

age of unprecedented corporate and political control over life inside of educational institutions this book provides a needed
intervention to investigate how the economic and political elite use traditional artifacts in K 16 schools to perpetuate their
interests at the expense of minoritized social groups The contributors provide a comprehensive examination of how textbooks
the most dominant cultural force in which corporations and political leaders impact the schooling curricula shape students
thoughts and behavior perpetuate power in dominant groups and trivialize social groups who are oppressed on the structural
axes of race class gender sexuality and dis ability Several contributors also generate critical insight in how power shapes the
production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and
privilege patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a
positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their
stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society
and to reflect upon how to challenge corporate and political dominance over knowledge production **Transforming**

Teacher Education Valerie Hill-Jackson,Chance W. Lewis,2023-07-03 Extracts from the text Why are fifteen million children
and youth in poverty not achieving when we know that low income students excel in the classrooms of star teachers who
comprise approximately 8 percent of the teaching force Whose needs or interests are being met in education reform today In
my own institution there has not been a systematic assessment of the effectiveness of the basic teacher education program
since the institution was founded over a century ago as a teachers college Imagine not one ever Teachers who empathize
with students and the life challenges they face soon realize that the dysfunctional bureaucracies will not permit them to meet
the needs of their students Half of the starry eyed beginners are gone in five years or less Why does teacher education focus
on the managerial instrumental or delivery system aspects of the profession The expert advice dispensed by schools of
education regarding what future teachers should do is not connected to any theory of learning or to any reality of life in
school classrooms Why has the recruitment process resulted in a cohort of teachers who are unable to connect with their
students Does a qualified teacher equate to a quality teacher The best hope of getting more effective teachers from university

teacher preparation programs is to base their budgets on the number of their graduates who serve in challenging schools and their effectiveness with children and youth At the district level the salaries of hiring officials should be based on how well these officials identify and retain quality teachers In this book 12 distinguished scholars provide a hard hitting thoroughly researched historical and theoretical critique of our schools of education and offer clear recommendations on what must be done to ensure all children can achieve their potential and contribute to a vibrant democratic society What Is Happening

American Memories Joachim J. Savelsberg,Ryan D. King,2011-09-01 In the long history of warfare and cultural and ethnic violence the twentieth century was exceptional for producing institutions charged with seeking accountability or redress for violent offenses and

human rights abuses across the globe often forcing nations to confront the consequences of past atrocities The Holocaust ended with trials at Nuremberg apartheid in South Africa concluded with the Truth and Reconciliation Commission and the Gacaca courts continue to strive for closure in the wake of the Rwandan genocide Despite this global trend toward accountability American collective memory appears distinct in that it tends to glorify the nation's past celebrating triumphs while eliding darker episodes in its history In *American Memories* sociologists Joachim Savelsberg and Ryan King rigorously examine how the United States remembers its own and others atrocities and how institutional responses to such crimes including trials and tribunals may help shape memories and perhaps impede future violence *American Memories* uses historical and media accounts court records and survey research to examine a number of atrocities from the nation's past including the massacres of civilians by U.S. military in My Lai Vietnam and Haditha Iraq The book shows that when states initiate responses to such violence via criminal trials tribunals or reconciliation hearings they lay important groundwork for how such atrocities are viewed in the future Trials can serve to delegitimize violence even by a nation's military by creating a public record of grave offenses But the law is filtered by and must also compete with other institutions such as the media and historical texts in shaping American memory Savelsberg and King show for example how the My Lai slayings of women children and elderly men by U.S. soldiers have been largely eliminated from or misrepresented in American textbooks and the army's reputation survived the episode untarnished The American media nevertheless evoked the killings at My Lai in response to the murder of twenty-four civilian Iraqis in Haditha during the war in Iraq Since only one conviction was obtained for the My Lai massacre and convictions for the killings in Haditha seem increasingly unlikely Savelsberg and King argue that Haditha in the near past is now bound inextricably to My Lai in the distant past With virtually no criminal convictions and none of higher ranks for either massacre both events will continue to be misrepresented in American memory In contrast the book examines American representations of atrocities committed by foreign powers during the Balkan wars which entailed the prosecution of ranking military and political leaders The authors analyze news accounts of the war's events and show how articles based on diplomatic sources initially cast Serbian President Slobodan Milosevic in a less negative light but court-based accounts increasingly portrayed Milosevic as a criminal solidifying his image for the public record *American Memories* provocatively suggests that a nation's memories don't just develop as a rejoinder to events they are largely shaped by institutions In the wake of atrocities how a state responds has an enduring effect and provides a moral framework for whether and how we remember violent transgressions Savelsberg and King deftly show that such responses can be instructive for how to deal with large-scale violence in the future and hopefully how to deter it A Volume in the American Sociological Association's Rose Series in Sociology
