Mortal Minds Gerald M. Woerlee, 2010-06-03 With its easy to read and personal style this book provides some intriguing new explanations of the physiology of death and the dying experience Susan Blackmore PhD Author of *Dying to Live* Dying is the last conscious experience undergone by each person But what do the dying experience In the last few decades a good deal of publicity has surrounded people who have been close to death and then reported intense experiences that seem to suggest a supernatural existence beyond death Does the conscious mind somehow continue to exist after the body has passed away *Mortal Minds* answers these questions Dr G M Woerlee explains how the normal functioning of the human body near death can generate beliefs in the reality of the supernatural and life after death An anesthesiologist with more than twenty years of hospital experience Dr Woerlee has been struck over the years by the similarities between the body's symptoms under anesthesia and its reactions near death Among the issues he addresses are the sensations of being disembodied that those near death often describe the perception that mind and body are separate components of existence whether there is such a thing as a soul the physical effects of decreased oxygen to the brain and the visions that the dying sometimes report from rapturous experiences of eternal peace to diabolical dreams While not dismissing near death experiences as mere hallucinations Dr Woerlee is also careful to point out that even powerful psychological impressions by themselves do not constitute scientific proof of life after death Taking this balanced objective stance he succeeds in conveying a better understanding of the dying process and helping us all to realize the nature of these final experiences G M Woerlee Leiden The Netherlands is an anesthesiologist affiliated with the Rijnland Hospital in Leiderdorp The Netherlands and the author of two books on anesthesiology

Biology Joseph S. Levine,Kenneth Raymond Miller,Prentice-Hall Staff,1998-05 Pharmacology for the Primary Care Provider - E-Book Marilyn Winterton Edmunds,Maren Stewart Mayhew,2009-02-26 Written by and for nurse practitioners this practical textbook focuses on what primary care providers need to learn and practice drug therapy With an overall emphasis on patient teaching and health promotion you will learn how to provide effective patient teaching about medications and how to gain patient compliance Drug coverage focuses on key drugs rather than prototype drugs so you can find important information about the most commonly used drugs rather than the first drug in each class You will also find discussions on the legal and professional issues unique to nurse practitioners and other primary care providers The 3rd edition also features an expanded emphasis on established clinical practice guidelines and evidence based practice plus two new chapters that cover drugs for ADHD and drugs for dementia

UNIQUE Written specifically for nurse practitioners with an overall emphasis on patient teaching and health promotion

UNIQUE Covers specific topics such as prescriptive authority role implementation and writing prescriptions Presents comprehensive coverage of the drugs most commonly prescribed in and the issues most relevant to primary care practice

UNIQUE Identifies the Top 200 drugs in chapter openers with a special icon and covers them in depth to familiarize you with the most important need to know drug information Uses a consistent

heading scheme for each prototype drug discussion to make it easier to learn and understand key concepts Includes an introductory chapter on Design and Implementation of Patient Education that highlights content on patient teaching and compliance Includes specific Patient Education sections in each drug chapter Provides extensive coverage of drug therapy for special populations to alert you to special considerations based on age pregnancy race and other factors A separate chapter on Complementary and Alternative Therapies discusses the available complementary and alternative modalities including detailed information on actions uses and interactions of commonly used herbs Drug Overview tables at the beginning of each chapter outline the classifications of drugs discussed and provide a handy reference of drug classes and subclasses generic names and trade names Clinical Alerts highlight essential information that primary care providers must remember in order to avoid serious problems including cautions for prescribing information about drug interactions or warnings about particularly ominous adverse effects An entire unit covers drugs for health promotion to introduce you to drugs commonly seen in outpatient primary care settings and to prepare you for practice in a society increasingly focused on health promotion and disease prevention Includes separate chapters on Immunizations and Biologicals Weight Management Smoking Cessation Vitamins and Minerals Over the Counter Medications and Complementary and Alternative Therapies
