You'll hear all the action with your new Realistic® PRO-2021 Programmable Scanning Receiver! You have direct access to over 23,000 frequencies in nine action radio bands including police, fire, ambulance, aircraft, ham radio, and transportation services! And your PRO-2021 scans up to 200 channels so you won't miss any of the excitement.

The secret to the PRO-2021 is a custom-designed microprocessor — a computer on a chip! The front panel keyboard lets you easily enter and change frequencies whenever you wish. The microprocessor also gives you special functions not found on other scanning receivers. Curious about what's on the air in your area? The PRO-2021 will automatically search for active stations in frequency ranges of your choice. You can locate new stations and services easily!

And if there's a frequency you're especially interested in, the PRIORITY key will make sure you never miss a call on it. You can listen or scan other channels and your PRO-2021 will automatically switch to the PRIORITY channel when a call is received on it!

Your PRO-2021 achieves superior performance with the very latest in solid-state technology. In addition to the microprocessor, your PRO-2021 has a phase-locked loop (PLL) IC, 4 C-MOS ICs, 6 integrated circuits, 30 transistors, 58 diodes and a liquid crystal

The Embodied Philosopher Konrad Werner, 2021-10-30 The book is the first formulation of a meta philosophical scheme rooted in the embodied cognition paradigm The latter views subjects capable of cognition and experience as living embodied creatures coupled with their environments On the other hand the emergence of experimental philosophy has given rise to a new context in which philosophers have begun to search for a more thorough definition of philosophical competence The time is ripe for these two trends to join their efforts Therefore the book discusses what it means for a human being thought of as a living subject to pursue philosophy In this context in contrast to the existing literature philosophical competence must not be conflated with competence in philosophy The former is a skill or attitude The book refers to this peculiar attitude as the recognition of one s epistemic position
