**Fire and Rescue Service manual** Great Britain. Fire Service Inspectorate, 2007-03-07. Incidents involving rescue from road vehicles are dramatically increasing in frequency. There are some 3500 deaths on the road each year with 35 000 serious injuries. Modern motor vehicles are becoming safer for occupants due to advancement in technology so persons are more likely to survive high impact speeds but are also more likely to become entrapped. The Fire and Rescue Service as the primary rescue service requires national guidance to ensure a similar standard of response anywhere in the UK. This manual is designed to highlight current best practice with regard to vehicle rescue techniques and first responder trauma care. Each chapter forms an independent reference source but the publication as a whole forms a complete guide. Chapters cover vehicle design and construction, dealing with incidents, safety procedures, operational procedures, extrication, equipment, medical considerations, and trauma care. Integrated Personal Development System I P D S Appendices cover Highways Agency, Fire and Rescue Service memorandum of understanding, training and general information, and emergency services personnel. ESP aide mmoire. The CD ROM Vehicle extrication techniques is a multi media guide to rescue tool handling and extrication techniques.
