Shaping the Global Leader Henry Biggs, Tom Bussen, Lenny Ramsey, 2019-09-02. Considering behavioral norms in their cultural contexts, this book arrives at a fully operational international leadership theory and makes it accessible to academic and professional readers alike. *Shaping the Global Leader* fundamentally covers eight cultural dimensions gleaned from acclaimed international leadership scholars such as Geert Hofstede and the GLOBE study authors. Each cultural dimension is followed by interviews of renowned organizational leaders who relate their experiences in that area, and each section underscores strategies for moving forward. The authors highlight critical lessons from classic behavioral psychology experiments and apply these findings to the international organizational context. This book serves as an eminently readable and enlightening handbook for those working, leading or studying interculturally. Both students and professionals in international leadership or business will be provided with clear and actionable organizational insights for an increasingly complex global landscape.

The Puritan Gift Kenneth Hopper, William Hopper, 2009-01-30. Where does the Protestant work ethic come from? And how did America achieve such dominance in management for so long? *The Puritan Gift* traces the origins and the characteristics of American managerial culture which, in the course of three centuries, turned a group of small colonies into the greatest economic and political power on earth. It argues that the drive, energy and acceptance of innovation, competition, growth and social mobility, all of which lie at the root of America's management culture, have their origins in the discipline and ethos of America's first wave of European immigrants, the Puritans. And the authors warn as Americans distance themselves from the core values which produced their business and economic successes during the nineteenth and twentieth centuries, they put their future prosperity and security at risk. This is an original exploration of the dramatic and far-reaching consequences of the Puritans' gift to America: the ethos which produced the early success of America and what came to be known as the American dream.

Manufacturing Possibilities Gary Herrigel, 2010-07-15. *Manufacturing Possibilities* examines adjustment dynamics in the steel, automobile and machinery industries in Germany, the U.S. and Japan since World War II. As national industrial actors in each sector try to compete in global markets, the book argues that they recompose firm and industry boundaries, stakeholder identities and interests and governance mechanisms at all levels of their political economies. Micro-level study of industrial transformation in this way provides a significant window on macro-level processes of political-economic change in the three societies. Theoretically, the book marks a departure from both neoliberal economic and historical institutionalist perspectives on change in advanced political economies. It characterizes industrial change as a creative bottom-up process driven by reflective social actors. This alternative view

consists of two distinctive claims The first is that action is social reflective and ultimately creative When their interactive habits are disrupted industrial actors seek to repair their relations by reconceiving them Such imaginative interaction redefines interest and causes unforeseen possibilities for action to emerge enabling actors to trump existing rules and constraints Second industrial change driven by creative action is recompositional In the social process of reflection actors rearrange modify reconceive and reposition inherited organizational forms and governance mechanisms as they experiment with solutions to the challenges that they face Continuity in relations is interwoven with continuous reform and change Most remarkably creativity in the recomposition process makes the introduction of entirely new practices and relations possible Ultimately the message of *Manufacturing Possibilities* is that social study of change in advanced political economies should devote itself to the discovery of possibility Preoccupation with constraint and failure to appreciate the capaciousness of reflective social action has led much of contemporary debate to misrecognize the dynamics of change As a result discussion of the range of adjustment possibilities in advanced political economies has been unnecessarily limited
