Nanopowders of Metal Oxides and Fluorides Sergey Sokovnin,Vladislav Ilves,2022-12-27 One of the directions of nanotechnology is the production of nanopowders NPs Nanopowders according to the currently widely used classification of nanomaterials belong to zero dimensional systems in which the limitation of wave functions occurs in all three directions Biological methods are considered the most environmentally friendly way to synthesize NPs but the possibility of biological contamination with mutated microorganisms cannot be ruled out This book presents a new method for producing simple and complex metal oxide and fluoride NPs based on the evaporation condensation process using pulsed electron beam evaporation It presents the results of more than 10 years of study of the characteristics of NPs produced using the aforementioned method This eco friendly method ensures the production of clean NPs which are mesoporous and suitable for use in various applications such as medicine spintronics optoelectronics dosimeters photocatalysis semiconductors and ultraviolet and blue lasers Importantly these NPs have the potential to be used as a drug delivery system and in the creation of new nanostructures that do not contain noble metals The book will be useful for the researchers in macromolecular science nanotechnology chemistry biology and medicine especially those with an interest in drug delivery or cancer therapy
