The Routledge Companion to Contemporary Art, Visual Culture, and Climate Change T. J. Demos, Emily Eliza Scott, Subhankar Banerjee, 2021-02-26 International in scope this volume brings together leading and emerging voices working at the intersection of contemporary art visual culture activism and climate change and addresses key questions such as why and how do art and visual culture and their ethics and values matter with regard to a world increasingly shaped by climate breakdown Foregrounding a decolonial and climate justice based approach this book joins efforts within the environmental humanities in seeking to widen considerations of climate change as it intersects with social political and cultural realms It simultaneously expands the nascent branches of ecocritical art history and visual culture and builds toward the advancement of a robust and critical interdisciplinarity appropriate to the complex entanglements of climate change This book will be of special interest to scholars and practitioners of contemporary art and visual culture environmental studies cultural geography and political ecology

Sustainable Construction Processes Steve Goodhew, 2016-04-13 This book explores the concepts and practicalities that lead to sustainable construction It breaks new ground by providing the reader with the underlying principles of how to build sustainably and then assesses many of the tools required for the task From energy to materials and from procurement to operation all aspects play their part in turning a theoretically sustainable building project into a reality There are many guidelines for the designer on how to maximise the sustainability of buildings but this resource text supplements these by focusing on the construction and operational aspects of sustainable buildings as well as some of the more fundamental design related considerations Offers an excellent text for those learning to construct design and operate sustainable buildings Covers the drivers for sustainable construction

definitions historical impacts climate change and global regional and individual responses enables the construction professional to achieve optimum solutions both in design process and the aftercare of buildings evaluates the effectiveness of different renewable technologies and provides guidance on the practicalities of their use Alerts the reader to future trends in this field *Green Building Handbook: Volume 1* Tom Woolley, Sam Kimmins, Rob Harrison, Paul Harrison, 2002-09-11

Environmentally responsible building involves resolving many conflicting issues and requirements Each stage in the design process from the fundamental decisions about what where and even whether to build has implications for the environment Evolving out of the success of Green Building Digest a publication described by Building Design as well researched authoritative and exhaustive this practical new handbook considers the environmental issues which relate to the production use and disposal of key building products and materials It is designed to help specifiers and purchasers gain awareness of the potential environmental impact of their decisions Chapter by chapter Green Building Handbook looks at a different sector of the trade from flooring to roofing comparing the environmental effects of commonly available products with less well known green alternatives A Best Buy section then ranks these products from lowest to highest impact *Food Autonomy in Chicago* Pancho McFarland, 2025 Through eighteen years of field research dialogues with colleagues deep involvement in the food movement community in Chicago and introspection Pancho McFarland asks Is the loosely connected network of Black and Indigenous land stewards and food warriors in Chicago an anticolonial force for the liberation of all our relations This examination of a sector of the food autonomy movement in Chicago provides important new ways of understanding race relations gender sexuality spirituality pedagogy identity and their importance to the dynamics of social movements Additionally the book explores how revolutionary culture principles and organization of American Indigenous diasporan Africans anarchist Mexicans and others have been adopted adapted or rejected in our food movement In this autoethnography of the food movement McFarland argues that at our best we work to establish a new society like that theorized and enacted by Indigenous and Black anarchists However the forces of Wetiko colonialism capitalism heteropatriarchy and white supremacy make the work of BIPOC food warriors difficult Wetiko s conceptual categories including race gender sexuality and citizenship influence our worldviews and affect our behaviors These limitations and our responses to them are captured in the dialogues and chapters of *Food Autonomy in Chicago*

**The Final Empire** Wm. H. Kötke, 2007-11 In spite of its tough message there is much compassion and humanity in The Final Empire Right away as you begin to read this work you sense increasingly the grand perspective in K tke s words He is not speaking of anarchy He is offering vital common sense It s just that his meaning is so unavoidably political And so much against what we have been taught all our lives The materialistic values of civilization teach us that the accumulation of wealth is progress The material wealth of the civilization is derived from the death of the earth the soils the forests the fish stocks the free resources of flora and fauna The ultimate end of this is for all human species to live in giant parasitical cities of cement and metal while surrounded by deserts of exhausted soils The simple polar opposites are the richness and wealth of the natural life of earth versus the material wealth of people living out their lives in artificial environments This amounts to a direct challenge to

humankind A demand for radical change A re envisioning of our part in the community of life and the precepts of individuality And Mr K tke provides a strong argument for this case He traces the environmental scars of civilization through the ages Empire after empire desertification of the top soil winds its way around the globe in an erosive helix from China to India to Mesopotamia to Italy to North America As radical as it may seem at first glance The Final Empire is a necessary and sensible primer for the recovery of the planet It blends a critical statistical analysis of our deteriorating environment with a positivism of hope for a post empire age and a new whole human relation to the living community of Earth Dan Armstrong Author of the Novels Prairie Fire and Taming the Dragon
