

As part of my health promotional plan, I aim to devote a minimum of 210 minutes to physical activities per week. I am usually quite busy with my work and studies; thus, it was decided to divide that time equally between five to seven days of the week so that my training lasts 30-45 minutes. In order to increase the chances of successful habit acquisition, I thought that it would be best to engage in physical activity approximately at the same time every day. In this regard, previous research indicates that there are slightly more benefits to exercise in the mornings as it is associated with a positive mood and increased cognitive capacity throughout the day (Holden, 2020). Therefore, considering this information and my schedule, I decided to include physical activity in my morning routine before or after breakfast, except for some cases that would be discussed later.

I enjoy several activities, such as walking, dancing, water aerobics, yoga, cleaning, shopping, and bike riding. I think this is the right combination to increase my physical strength, flexibility, stamina, and emotional condition and lose body fatness. For instance, water aerobics can make my muscles stronger, dancing is good for enhancing stamina and creating a positive mood, and yoga can help me to be more flexible. Moreover, cleaning and shopping can significantly reduce my level of stress. However, I would not be able to engage in all of the listed activities in the morning. For example, the dancing classes usually start in the evenings; thus, I will need to schedule them for later in the day.

Now, it is important to discuss which benefits I expect to receive due to a new lifestyle. First of all, by engaging in exercise, I hope to reduce the risk of acute and chronic diseases. Such a positive effect of physical activity has already received substantial scientific support. As such, Phillips et al. (2018) assert that exercising is positively associated with the prevention and control of heart disease, cancer, and diabetes, to name a few. Additionally, I expect to lose some weight and have a fitter body. Finally, through physical activity, I want to achieve a healthier state of mind.

Nevertheless, some external and internal factors can negatively affect my efforts to start a more active life. As for the former, my previous attempts to
