Schwartz, Lisa S., Ganjoo, Rohini, 2022-04-29 Despite significant demand for healthcare professionals in the workforce, admission to health professional graduate programs is highly competitive, with less than half of all medical school applicants gaining admission annually. The application process is nuanced, complex, and costly, which can often be a significant barrier to otherwise highly qualified students, particularly those from backgrounds underrepresented in the healthcare workforce. Further understanding of the best practices in navigating the application processes, academia, and professional development is crucial for those advising pre-health students. The Handbook of Research on Advising and Developing the Pre-Health Professional Student considers current practices and research regarding academic and extracurricular preparation of undergraduate students who wish to enter health professions and offers new pre-health professional advisors, as well as more seasoned advisors and other administrators, a resource to assist them in their professional journey. Covering a range of topics such as advisor relationships and lifelong learning skills, this major reference work is ideal for advisors, healthcare professionals, academicians, researchers, practitioners, scholars, instructors, and students. **Unveiling the Art of Writing: A**
