Sub-section IV: Struts

INSTALLATION

All models

Remove the control arm(s).

- NOTE: When installing the strut, ensure the top angle of bearing surface of the strut is in line with the hole in spring.

Track location & alignment

Track location and alignment are most critical for the car and are critical to driving performance. Track location and steering must be correct for good track alignment.

Strut (single wheel)

Step:

After use of vehicle (before or after service), check the track location of wheels and all major controls.

On cars with 4 wheel drive, check the track location of both the front and rear wheels as shown.

NOTE: The front wheel alignment must be checked before the car is driven. If the front wheel alignment is not correct, the car will have a tendency to drift.

Strut (dual suspension)

On the use of springs and shock with a dual suspension, the car should be driven in a straight line. The car should not have a tendency to drift. The car should be driven in a straight line. The car should be driven in a straight line.
