How can the use of frequency information from corpora be used in foreign language teaching? A corpus-based study on vocabulary in course books Karin Dietiová, 2019-02-27 Diploma Thesis from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade A course Angli tina language English abstract

How can corpora be used to improve vocabulary learning in language acquisition This thesis focuses on the use of word frequencies by teachers of English Teaching vocabulary to young learners is one of the most challenging responsibilities that teachers face The methodology chosen for the presentation of vocabulary is crucial for the learning success of the students There is a great amount of studies on how computers can facilitate the learning of English as a foreign language EFL and with the development of immense corpora both teachers and students now have access to hundreds of millions of words and the possibility to explore their occurrence patterns This advantage is however rarely used in practice partly due to the

relatively short existence of this discipline but most importantly due to the lack of information about corpora in English language teaching ELT This paper will present the concept of course book vocabulary and present word frequencies in learner s dictionaries The research part of this thesis deals with a linguistic analysis of data extracted from course books and their comparison with the Oxford list of 3000 essential words The aim of the thesis is to investigate the linguistic attributes of texts forming course books and to examine their relation

 U.K. Srivastava, Pramila Srivastava, 2018-01-01 Indian economy is undergoing structural changes The share of agriculture
 and allied activities in GDP has declined over the years On farm Jobs are diminishing or stagnant There is a need to generate
 off farm jobs through secondary and tertiary processing of agriculture crop horticulture animal husbandry fisheries forest
 produce raw material and these are not increasing to keep pace with the needs despite potential In India more than 75% of
 agro processing is done by informal and small enterprises But most informal and small unit suffer from market and
 technology constraints Therefore they cannot go for higher value addition from the main products and from the by products
 These informal and small enterprises are not in a position to create an integrated value chain which can have links with the
 farmers As technology is outmoded these units are not in a position to give quality assurance and meet food safety standards
 Their products are marketed only in less demanding nearby local markets World over there is transition from informal and
 small agro industrial enterprises to large units which are competitive in terms of price and quality equitable not exploiting
 any member of value chain and inclusive treating farmers as strategic business partners rather than adversaries They use
 latest and innovative technology and have national and international markets for selling their products They enjoy scale
 economies are able to comply with national and international standards of quality assurance and go for higher level of value
 addition They can forge linkages with the farmers through contract farming and direct procurement and assure their raw
 material supply by treating the farmers as strategic business partners But these enterprises require the enabling conditions
 which make it possible to run the enterprises profitably along with transformation of rural areas Over the years the

Government of India and nearly all the State Governments have now created most attractive enabling environment Therefore in our assessment India is poised for a great leap in investments in food processing and marketing The book contains 18 chapters dealing with the entire project cycle of agro industries for sustainable rural transformation The most insightful part is the 12 real life case studies The book would be useful to agro entrepreneurs agro processing industries policy makers bankers management consultants students of agriculture universities cooperative management training institutions and MBA students
