Oxford University Press 2011 3b Mock Paper:

Exaggerated Claims? David Walker, 2015-11-30 David Walker's analysis is incisive and hard hitting. Anyone who believes in the power of social science to inform better policy making should take his criticisms seriously. Sue Duncan, Former Chief Government Social Researcher and Head of the Government Social Research Service. David Walker has written an unofficial summary of ESRC's achievements and struggles. He brings to the task long experience of the organisation and of the key players, a great familiarity with the literature and a sceptical nature. The result is stimulating, instructive, contentious and sometimes even infuriating. David Rhind, Chair of the Nuffield Foundation. What is the role of the state in distributing research money? How do arms length funding agencies relate to public policy and business? This original study looks at the main social science funding agency in the UK which was established 50 years ago. It examines how funding decisions are related to power. The critical and policy aspects of successful research bids are discussed. Walker asks the tricky question: why has social science research not achieved a more salient role in state policy formation and management strategy? Is the funding agency responsible? Insightful, engrossing and highly original, the book will be required reading for anyone who has written or will write a Social Science research bid and more widely for students of power, knowledge and culture.

If All the World Were Paper Tyler W. Williams,2024-10-01 How do writing and literacy reshape the ways a language and its literature are imagined *If All the World Were Paper* explores this question in the context of Hindi the most widely spoken language in Southern Asia and the fourth most widely spoken language in the world today Emerging onto the literary scene of India in the mid fourteenth century the vernacular of Hindi quickly acquired a place alongside classical languages like Sanskrit and Persian as a medium of literature and scholarship The material and social processes through which it came to be written down and the particular form that it took as illustrated storybooks loose leaf textbooks personal notebooks and holy scriptures played a critical role in establishing Hindi as a language capable of transmitting poetry erudition and even revelation *If All the World Were Paper* combines close readings of literary and scholastic works with an examination of hundreds of handwritten books from precolonial India to tell the story of Hindi literature s development and reveal the relationships among ideologies of writing material practices and literary genres Tyler W Williams forcefully argues for a new approach to the literary archive demonstrating how the ways books were inscribed organized and used can tell us as much about their meaning and significance as the texts within them This book sets out a novel program for engaging with the archive of Hindi and of South Asian languages more broadly at a moment when much of that archive faces existential threats

Tourism and Citizenship Raoul Bianchi,Marcus Stephenson,2014-02-24 More than sixty years since the 1948 Universal Declaration of Human Rights first enshrined the right to freedom of movement in an international charter of human rights the issue of mobility and the right to tourism itself have become increasingly significant areas of scholarly interest and political debate However despite the fact that cross border travel implies certain citizenship rights as well as the material capacity to travel the manifold intersections between tourism and citizenship have not received the attention they deserve in the literature This book endeavours to fill this gap by being the first to fully examine the role of tourism in wider society through a critically

informed sociological reflection on the unfolding relationships between international tourism and distinct renderings of citizenship with particular emphasis on the ideological and political alignments between the freedom of movement and the right to travel. The text weaves its analysis of citizenship and travel in the context of addressing large scale societal transformations engendered by globalization, neoliberalism and the geopolitical realignments between states as well as comprehending the internal reconfiguring of the relationship between citizens and states themselves. By doing so it focuses on key themes including tourism and social citizenship, rights, race, culture and minority rights, states, markets and the freedom of movement, tourism, peace and geo politics, consumerism and class and ethical tourism, global citizenship and cosmopolitanism. The book concludes that the advancement of genuinely democratic and just forms of tourism must be commensurate with demands for distributive justice and a democratic politics of mobility encompassing all of humanity. This timely and significant contribution to the sociology and politics of international tourism through the lens of citizenship is a must read for students and scholars in both in the fields of tourism and social science. The royalties received from this book will be donated to the International Porter Protection Group. EU Constitutional Law Allan Rosas, Lorna Armati, 2012-08-03

The second revised edition of this acclaimed book brings the story of the EU's constitutional journey up to date. The EU's constitution composed of a myriad of legal texts, case law and practice is a moving target subject to continuous change and the past two years have seen no slacking in the pace of that change. With a wider geographical ambit than ever the EU faces unprecedented political, economic and cultural challenges all of which impact upon the evolution of its constitution. Moreover the crisis in the Eurozone has given rise to the need for a whole new chapter focussing on the institutional reforms embarked upon in the quest to restore financial order. The book succeeds where others have struggled in making sense of the EU's complex constitutional order focussing on its essential features but taking into account the profound changes that have taken place over the past 20 years. The EU has become much more than an internal economic market and has recently become active in areas such as immigration and third country nationals, security and defence policy and penal law and procedure while the crisis in the Eurozone has triggered an increasing focus on economic and fiscal policy. Eschewing too much detail the authors underline the essential values, principles and objectives of the integration regime as well as its basic normative structure and hierarchy. In this context the decentralised nature of the EU is highlighted as an integral part of its constitutional make up. Recurring themes include European citizenship, fundamental rights and the rule of law. The book also confronts head on the problems and challenges facing the Union and the gap which is often perceived between lofty ideals and harsh realities. The book will be useful to students of EU law and European integration but will also appeal to a broader audience of researchers and practitioners including political scientists. *The Oxford Handbook of Citizenship* Ayelet Shachar, Rainer Bauboeck, Irene Bloemraad, Maarten Vink, 2017-08-03. Contrary to predictions that it would become increasingly redundant in a globalizing world, citizenship is back with a vengeance. *The Oxford Handbook of Citizenship*
