**Down, Dirty and Divine** Stephanie Clarke,2012-08-16 Down Dirty and Divine is an invitation to readers to

go on a meaningful and transformational journey through the underground of London and to assist in healing the City whilst also cleansing their own soul and the soul of the planet. Murder and madness, death and disease, crime and corruption, pain and punishment, ghouls and ghosts: this is London's morbid history. But it is humanity's history too. Rev Stephanie Clarke answers the question: how can we heal? Selecting 12 London Underground Tube Stations as the physical and spiritual entry points into the City's underbelly, she offers readers some historical information, some personal reflection and an affirmative prayer to heal the particular trauma associated with the site of each Tube Station. In a dream state, the author was told that the 2012 Olympic Games would stimulate an unprecedented convergence of the masses upon the City of London and would be a powerful catalyst to usher in global transformation. Serendipitously, many of London's great citizens, including Sir Christopher Wren, the architect of St Paul's Cathedral, have long held the vision of London as the New Jerusalem, a celestial city of light and a universal centre of peace and reconciliation. *Down Dirty and Divine* is a spiritual tour guide, inviting readers to be active instruments in the fulfillment of this grand planetary vision in 2012 and beyond. **H.G. Wells and the Twenty-First Century** Bill Cooke, 2023-09-15 H.G. Wells has been branded as a novelist who betrayed his vocation. But Wells saw himself as what we would today call a public intellectual. How credible is this claim? And what happens when we look at him in this way? So typecast has Wells's reputation become that neither of these questions has been previously asked, but when we look at Wells as a thinker, we find a whole new quality to his later works, which have invariably been dismissed by literary scholars as of low quality or even not worth reading. In particular, Wells's prescience as a prophet of our current environmental problems stands out: for example, he foresaw anthropogenic climate change as early as 1931. Popular conceptions of Wells as racist imperialist and eugenicist are also challenged. What emerges is a new perspective on a significant public intellectual and pioneering prophet of the twenty-first century. *State-led Privatisation and the Demise of the Democratic State* Mike Raco, 2016-04-01 For decades now we have been told that we are living through a governance revolution. Gone are the days when government agencies and bureaucrats told us what to do and how to do it. We are no longer clients of the state but empowered citizens who are able to take greater control over our own lives and the activities of those who govern in our name. Across the world, the prevailing narrative has become one of Good Governance, devolution, liberation and freedom of expression. In policy fields as diverse as development, planning, healthcare and public transport, a neo-pluralist rhetoric has emerged based on the principles of co-production and partnership working. And yet at the same time a curious paradox is emerging. Whilst the prevailing zeitgeist is one of openness and citizen empowerment, this book will show that in reality new modes of governance are emerging in which state controls have actually been expanded into many spheres of life that were previously left unregulated. For some, a new political economy of regulatory capitalism has emerged and this in turn has ushered in unprecedented forms of state-led privatisation under which democratically elected politicians have voluntarily handed over their powers, responsibilities and resources to new corporate elites who promise to deliver

services in more efficient and equitable ways As the discussion will show in reality the rhetoric of Good Governance has therefore been used to legitimate the wholesale transfer of welfare assets and services beyond the democratic control of state actors and the citizens that they represent Privatisation has become a new utopianism that involves a revolution in ways of thinking about democracy governance and urban management the implications of which will be felt by current and future generations
