Viola,2020-03-10

This book explores young people's civic experiences in contemporary American society and how they navigate the political world in an era defined by digital media. Drawing on the experiences of young people before they have reached voting age, the book provides vital perspectives on citizenship and civic engagement of a part of the population that is often overlooked. The author engages with the tensions young people encounter in their everyday personal and civic lives, particularly in their understanding and experience of civic identity in ways that are shaped by society's misperceptions of youth. The book introduces a new framework of civic identity that has been directly informed by the lived civic experiences of young people themselves. The findings will be of great interest to researchers and students working in political science, sociology, youth studies, education studies, and media studies, as well as policy makers, practitioners, and parents of young people.

**What Kind of Democracy?** Kateřina Vráblíková, 2016-08-12 The broad expansion of non-electoral political participation is considered one of the major changes in the nature of democratic citizenship in the 21st century. Most scholars, but also governments, transnational and subnational political institutions, and various foundations have adopted the notion that contemporary democratic societies need a more politically active citizenry. Yet contemporary democracies widely differ in the extent to which their citizens get involved in politics beyond voting. Why is political activism other than voting flourishing in the United States but is less common in Britain and almost non-existent in post-communist countries like Bulgaria? The book shows that the answer does not lie in citizens' predispositions, social capital, or institutions of consensual democracy. Instead, the key to understanding cross-country differences in political activism beyond voting rests in democratic structures that combine inclusiveness and contestation. **What Kind of Democracy?** is the first book to provide a theoretically driven empirical analysis of how different types of democratic arrangements affect individual participation in non-electoral politics.

**Youth Citizenship and the European Union** Elvira Cicognani, Frosio Motti-Stefanidi, 2020-06-29 This book applies a number of different disciplinary and geographical perspectives to ascertain whether and how European youth identify with the EU, trust EU institutions, and engage in EU issues. It investigates the factors and processes that predict the different ways in which young Europeans engage or do not engage with social and political issues and become active European citizens. The volume is based on results from the first two years of the Horizon 2020 CATCH EyoU project: Constructing Active Citizenship with European Youth Policies, Practices, Challenges, and Solutions. It addresses different dimensions of active citizenship in the EU and different processes and contexts that explain the construction of youth active citizenship, including societal level factors such as policy context and media interaction, level contexts such as school and family, and individual level factors. The final chapter emphasizes the impact of the current historical context on the development of young Europeans' civic identity and their understanding of the social and political reality. With contributions from a variety of disciplines including psychology, political science, communications, and education, and spanning geographic contexts across Europe, this book will be of interest to researchers studying contemporary European youth and the construction of young people's identity. *Democratic Innovations in Central and Eastern Europe* Sergiu Gherghina,Joakim Ekman,Olena Podolian,2020-05-21 Democratic Innovations in Central and Eastern Europe expands research on democratic innovations by looking specifically at different forms of democratic innovations in Central and Eastern Europe The book covers direct democracy referendums in particular deliberative democracy practices and e participation forms which are salient in practice because they match the political realities of our time Expert contributors show how the recent actions of ordinary citizens in several Central and Eastern European countries have challenged the contemporary political order and grassroots movements and diverse forms

of mobilization have challenged the notion of weak civil societies in the East. The empirical evidence presented attempts to deepen citizen involvement in political contexts sometimes quite different from the democratic political systems in the Western world. Using lessons from a still largely underexplored part of Europe, the book both complements and revises theoretical approaches or complements empirical results in existing studies on democratic innovations. Democratic Innovations in Central and Eastern Europe will be of great interest to scholars working on democracy, political systems, political engagement, and Central and Eastern European politics. The chapters, originally published as a special issue of *Contemporary Politics*, are included in *Handbook of Research on Civic Engagement and Social Change in Contemporary Society* (Chhabra, Susheel, 2018-02-23). Outreach and engagement initiatives are crucial in promoting community development and social change. This can be achieved through a number of methods including public policy and urban development. The *Handbook of Research on Civic Engagement and Social Change in Contemporary Society* is a critical scholarly resource that examines the unexplored field of applying social change to civic engagement in an effort to enlarge public welfare activities. Featuring coverage on a broad range of topics such as civic education, sustainable development, and child labor, this publication is geared towards academicians, researchers, and students seeking current research on civic engagement and public welfare.
