Architecture and Modernity Hilde Heynen, 2000-02-28 Bridges the gap between the history and theory of twentieth century architecture and cultural theories of modernity In this exploration of the relationship between modernity dwelling and architecture Hilde Heynen attempts to bridge the gap between the discourse of the modern movement and cultural theories of modernity On one hand she discusses architecture from the perspective of critical theory and on the other she modifies positions within critical theory by linking them with architecture She assesses architecture as a cultural field that structures daily life and that embodies major contradictions inherent in modernity arguing that architecture nonetheless has a certain capacity to adopt a critical stance vis vis modernity Besides presenting a theoretical discussion of the relation between architecture modernity and dwelling the book provides architectural students with an introduction to the discourse of critical theory The subchapters on Walter Benjamin Ernst Bloch Theodor Adorno and the Venice School Tafuri Dal Co Cacciari can be studied independently for this purpose

Graphic Horizons Luis Hermida González, João Pedro Xavier, Inés Pernas Alonso, Carlos Losada Pérez, 2024-04-05 This book reports on several advances in architectural graphics with a special emphasis on education research and heritage It gathers a selection of contributions to the 20th International Congress of Architectural Graphic Expression EGA 2024 held on May 27 29 2024 in Porto Portugal with the motto Graphic Horizons This is the third volume of a 3 volume set **New Book Design** Roger Fawcett-Tang, 2004-05-25 New Book Design showcases the most interesting influential and accomplished book designs from the last ten years It features over 100 titles published around the world each chosen for their outstanding design qualities from the publications of large mainstream publishers to those of small independent companies and even those from individual artists Included in its pages are lavishly produced books with unconventional formats and unusual print

techniques as well as less flamboyant publications produced for various different markets A wide variety of books are featured from paperback novels to architectural monographs from text based to profusely illustrated books Divided into four main sections Packaging Navigation Layout and Specification the book examines each facet of book design cover design contents and structure image usage grids typography paper printing and binding Clear photography captures each featured book and interviews with prominent book designers art directors and publishers provide extra insight New Book Design is sure to provide a rich source of inspiration to book designers and bibliophiles alike Neo-liberalism and the Architecture of the Post Professional Era Hossein Sadri, 2018-04-27 This book discusses the effects of Neo Liberal policies on the transformations of architectural and urban practices and education in the transition from the era of professionalism to post professionalism Building on previous literature in the field of contemporary theory of architecture it provides the necessary resources for the study of contemporary architecture and urban politics urban sociology local administration and urban geography Further it develops a political and critical perspective on contemporary practices of architecture and urbanism their implementation legal background political effects and social results The book will interest readers from a wide range of academic disciplines from political science to architecture and from urban studies to sociology **The Threefold Logic of Advanced Architecture** Manuel Gausa, Jordi Vivaldi, 2021-04-15 During the last 30 years Advanced Architecture has consolidated an interactive and informational logic that differs from that of Modernity and Postmodernity This logic is threefold it is modulated through three coexisting protocols modes of action whose peaks of intensity occur in three different decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 This work proposes a threefold cultural narrative whose interactive and informational logic differs from that of modernity and postmodernity It positions three different ethos by critically approaching the architectural side of a cultural mutation that has been affecting the Western experimental areas of knowledge and practice since the end of the last century A transformative process constituted by a constellation of transdisciplinary manifestations accelerations turns shortcuts and clusterizations that by no means can be read under one single epistemological umbrella In this sense rather than approaching the practice of architecture focusing on its disciplinary inner specificity this book approaches the research of experimental architecture focusing on its extra disciplinary entanglements It argues that a vast multiplicity of fields of knowledge participates in a cultural endeavour modulated through three protocols forms of action that singularize three decades Conformative Protocols 1990 2000 Distributive Protocols 2000 2010 and Expansive Protocols 2010 2020 These three periods shouldn't be read as three hermetic and concatenated monades but as three different modulations of the same narrative that is as three overlapping and coexisting systems whose peaks of intensity occur in three different decades However the main purpose of this book is not limited to unveiling the ethos of these three conjugations It also aims at using this framework as a time field a narrative map that moves from the classificatory to the cartographical in order to vectorize the last 30 years of experimental

architecture In this sense this book argues that this threefold set of protocols represents the progressive attempt to constitute critical interiorities looking for and produced through interactions that are increasingly more intimate and whose agents are increasingly more diverse A tendency oriented towards the consolidation of an intimacy between strangers that highly resonates with the cultural and technological landscape in which experimental architecture operates **Landscape**

Urbanism and its Discontents Andr s Duany, Emily Talen, 2013-06-11 Landscape Urbanism vs the New Urbanism negotiating the relationship between cities and the natural world **Diagrams: Tropes, Tools, Abstract Machines**

Christoph Lueder, 2020-11-04 Diagrams Tropes Tools and Abstract Machines examines the pervasive roles of diagrams as analytical generative narrative and critical devices manifest in design practices by architects and non architects that draw on thick cultural milieus and that operate at personal architectural and urban scales What are potentials of diagrams beyond representation as situated cultural practices corporeal engagement and choreographic script as instruments of speculation and invention as manifestation of ideas and incrimination of ideology as abstract machines in scenarios of allopo esis autopo esis and cosmopo esis *Play Among Books* Miro Roman, Alice _ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science

Getting it Right with Type Victoria Squire, Friedrich Forssman, Hans Peter Willberg, 2006 Typography is no longer the specialist domain of the typesetter these days anyone who uses a computer has access to a wide range of typefaces and effects This book offers an introduction to the basics of typography including choosing which typeface to use adjusting letter line and word spacing for improved legibility understanding kerning and leading and mastering typographic details such as italics punctuation and line endings The book is illustrated throughout with practical examples demonstrating good and bad solutions There are tips for specific design tasks such as letters charts tables and design for the screen and a glossary explaining typographic terms *El Lissitzky on Paper* Samuel Johnson, 2024-06-10 The artist and architect El Lissitzky 1890 1941 is celebrated for his contributions to painting architecture photography and graphic design and for his role in disseminating Russian and Soviet avant garde art in Europe during the 1920s Though he worked in a diversity of media Lissitzky nonetheless produced the majority of his work on paper in the form of innovative photomontages architectural drawings lithographs typography books and photo magazines This monograph the first career spanning archival study of Lissitzky since 1968 reveals that the artist's multiple pursuits arose from his deep commitment to print as the premier medium of public exchange in the young and turbulent twentieth century Samuel Johnson demonstrates that paper and print media were preoccupations that shaped Lissitzky's worldview values politics and production in ways that have never been fully appreciated Probing Lissitzky's stance on the problems of distribution and reception this book offers a compelling and nuanced portrait of Lissitzky as experimenter visionary designer technocrat and propagandist the very prototype of the twentieth century artist with a legacy that remains largely on paper

Redesigning Cities Jonathan Barnett, 2017-11-13 This book is recommended reading for planners preparing to take the AICP exam Too often no one is happy with new development Public officials must choose among unappealing alternatives developers are frustrated and the public is angry But growing political support for urban design developers interest in community building and successful examples of redesigned cities all over the U S are hopeful signs of change The author explains how design can reshape suburban growth patterns revitalize older cities and retrofit metropolitan areas where earlier development decisions went wrong The author describes in detail specific techniques materials and technologies that should be known but often aren't to planners public officials concerned citizens and others involved in development Fernand Léger Fernand Léger, Carolyn Lanchner, Jodi Hauptman, Matthew Affron, Museum of Modern Art (New York, N.Y.), 1998 Fernand Leger 1881 1955 is the only modern artist to choose modernity itself as his subject From his early series *Contrastes de formes* 1913 14 the first fully

abstract works to emerge from Cubism through his last realistic paintings of construction workers from the early 1950s
Leger's lifelong subject was the pulse and dynamism of contemporary life *Integral Urbanism* Nan Ellin, 2013-10-18

Integral Urbanism is an ambitious and forward looking theory of urbanism that offers a new model of urban life Nan Ellin's model stands as an antidote to the pervasive problems engendered by modern and postmodern urban planning and architecture sprawl anomie a pervasive culture and architecture of fear in cities and a disregard for environmental issues Instead of the reactive and escapist tendencies characterizing so much contemporary urban development Ellin champions an integral approach that reverses the fragmentation of our landscapes and lives through proactive design solutions

Architecture and the Unconscious John Shannon Hendrix, Lorens Eyan Holm, 2016-06-17 There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture or that use the formal and social logics of architecture for understanding the psyche But there remains work to be done in bringing what largely amounts to a series of independent voices into a discourse that is greater than the sum of its parts in the way that say the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design perception and understanding of architecture It brings together an international group of contributors who provide informed and varied points of view on the role of the unconscious in architectural design and theory and in doing so expand architectural theory to unexplored areas enriching architecture in relation to the humanities The book explores how architecture engages dreams desires imagination memory and emotions how architecture can appeal to a broader scope of human experience and identity Beginning by examining the historical development of the engagement of the unconscious in architectural discourse and the current and historical theoretical and practical intersections of architecture and psychoanalysis the volume also analyses the city and the urban condition
