

# Skoda Octavia 1996-2010 Workshop Manual

## Brief description of mechanical components of the TDI

### Setting distributor injection pump and toothed belt

The toothed belt drives the following components:

- camshaft
- distributor injection pump
- coolant pump

The belt wrap required is achieved by using two guide pulleys while correct tension is maintained by the semi-automatic toothed belt tensioning pulley.

### Adjusting toothed belt

Appropriate markings are provided for setting the timing: camshaft, camshaft, injection pump set point.

**Camshaft setting**  
Camshaft timing: dead centre for cylinder 1 is set up on the flywheel through the inspection hole of the piston.  
A setting device is required if the engine has been removed.

**Camshaft setting**  
The correct setting of the camshaft is determined by the camshaft timing marks. The camshaft timing marks are determined with two pins. The pins are inserted into the camshaft timing marks. The pins are then moved until they are in contact with the camshaft timing marks. The pins are then moved until they are in contact with the camshaft timing marks.

The injection pump is fixed with the injection pump gear in a fixed position. The injection pump gear is a fixed part of the engine. A precise adjustment can be achieved by loosening the 3 bolts, arrows.

**Note**  
Do not account slacken the nut for the bolt of the injection pump.  
If this is done, the basic setting of the injection pump will be altered and can no longer be set with workshop tools.

## 1.2 Summary of components of cylinder head - engines with identification characters A1V, B1Q
