

# The value added difference.

## OEC service and training programs will maximize return on your investment.

OEC training and service programs are designed to ensure the ongoing quality and reliability of your OEC system. Every OEC MTS site includes expert installation and on-site clinical training.

A certified service specialist works with your staff during your first on-site visit and training, and our specialists in service intervention coordinate 24/7/365 for your staff. Our unique Clinical Excellence program provides you with extensive training that can be shared with your current and future staff members.

Our dedicated team of more than 200 Field Service Engineers is made up of focused specialists dedicated to servicing OEC systems, ensuring they function smoothly while fixed-light live, live event imaging engineers in all 50 states and a 24-hour call center continuously monitor our OEC systems. Replacement and tuning of parts performance are easier for you and faster for your patients.

To assist your C-arm's power and performance, choose the service offering that best fits your needs. Our Full Service, Premier Care coverage includes a full system guarantee with scheduled preventive maintenance and offers many benefits including remote connectivity and on-site parts and labor. Features Clinical Service coverage is also available and provides technical after-sales support, back-up on-site support and discounts on all parts and accessories.

### Quality plus experience equals Peace of Mind

Expert Field Service Engineers averaging 12 years of experience, working with more than 10,000 hours of training each year. Dedicated Clinical Specialists training more than 10,000 surgeons and technologists each year. Genuine OEC factory-based and certified parts, service and training programs designed to put you into action and provide ongoing support. And if all that you can see your investment working for you and your patients.

Nine out of ten customers surveyed would recommend OEC Service to a colleague.

OEC MTS Site Setup Shows Prime MTS Image

Superb image quality and a wide range of clinical, surgical and vascular applications, the OEC MTS site is an ideal system for the OEC MTS clinical imaging of interventional settings.

OEC's latest digital mobile C-arm technology uses the patented "no image" or Motion-Independent Imageless technique that allows the user to perform OEC Digital Subtraction Angiography (DSA) imaging while moving the C-arm in systems. This allows more in imaging coupled with our unique Motionless Imaging Technology where motionless imaging is now possible with improved productivity. Achieve the same benefits of subtraction without all the fuss.

OEC's advanced image processing performs faster than other image technologies and applies specific processing algorithms to effectively "denoise" the image, resulting in a better view of the vessel structure when you need it.

The patented OEC technology processes each imaging profile uniquely to highlight the structure of interest. Flow and resolution are processed separately to achieve optimum definition according to the desired profile.

The comprehensive image quality and resolution structure is only achieved by using the unique imaging profile for a specific application. Image Control Profile.

**Textbook of Radiographic Positioning and Related Anatomy** John Lampignano, Leslie E. Kendrick, 2024-02-16 Selected for Doody s Core Titles 2024 in Radiologic Technology Gain the knowledge and skills you need to succeed as a radiologic technologist Textbook of Radiographic Positioning and Related Anatomy 11th Edition provides the essential information that you need to perform hundreds of radiographic procedures and produce clear diagnostic quality images Easy to follow guidelines help you learn anatomy and positioning and minimize imaging errors In fact each positioning page spotlights just one projection with bulleted information on the left side of the page and positioning photos anatomical drawings and correctly positioned and correctly exposed radiographic images on the right Written by imaging experts John P Lampignano and Leslie E Kendrick this book also provides excellent preparation for the ARRT certification examination Labeled radiographs radiographic overlays identify key radiographic anatomy and landmarks to help you recognize anatomy and determine if you have captured the correct diagnostic information on images

Coverage of the latest ARRT content specifications and ASRT curriculum guidelines prepares you for certification exams and for clinical practice. Display of just one projection per page in Positioning chapters presents a manageable amount of information in an easily accessible format. Positioning pages for projections show positioning photographs plus radiographic and anatomy labeled images side by side on a single page with written summaries of topics such as clinical indications, technical factors, patient and body part positions, recommended collimation field size, and evaluation criteria. Clinical Indications sections on positioning pages summarize conditions or pathologies that may be demonstrated by structures or tissues in an examination or projection. Evaluation Criteria on positioning pages describe the evaluation critique process that should be completed for each radiographic image. Pediatric, Geriatric, and Bariatric Patient Considerations help you accommodate unique patient needs. Critique images at the end of positioning chapters test your understanding of common positioning and technical errors found in radiographs. Review questions are provided on the Evolve website. NEW Updated photographs visually demonstrate the latest digital technology used in radiography with new radiographs as well as images of positioning and new equipment. NEW The latest ARRT content specifications and ASRT curriculum guidelines prepare you for certification exams and for clinical practice. NEW Updated radiographic projections have been reviewed and recommended by orthopedists, radiologists, educators, and technologists. NEW Expanded information on the bariatric patient is included, and coverage of outdated technology and positions is eliminated.

[Textbook of Radiographic Positioning & Related Anatomy - Pageburst E-Book on VitalSource](#)<sup>8</sup> Kenneth L. Bontrager, John Lampignano, 2013-02-08. Lists and definitions of the most common pathologies likely to be encountered during specific procedures help you understand the whole patient and produce radiographs that will make diagnosis easier for the physician. Labeled radiographs identify key radiographic anatomy and landmarks to help you determine if you have captured the correct diagnostic information on your images. Evaluation Criteria for each projection provide standards for evaluating the quality of each radiograph and help you produce the highest quality images. Clinical Indications sections explain why a projection is needed or what pathology is demonstrated to give you a better understanding of the reasoning behind each projection. Increased emphasis on digital radiography keeps you up to date with the most recent advances in technology. Completely updated content offers expanded coverage of important concepts such as digital imaging systems, updated CT information, and AART exam requirements. More CT procedures with related sectional images, especially for areas such as skull and facial bones, reflect the shift in the field from conventional radiography to CT. Updated art visually demonstrates the latest concepts and procedures with approximately 500 new positioning photos and 150 updated radiographic images. Additional critique images provide valuable experience analyzing images to prepare you to evaluate your own images in the practice environment. Updated Technique and Dose boxes reflect the higher kV now recommended for computed and digital radiography. Imaging Wisely program information from ASRT provides protocols to minimize radiation exposure during digital procedures. The latest standards for

computed radiography and digital radiography CR DR from the American Association of Physicists in Medicine ensures you are current with today's procedures and modalities
