Political English Thomas Docherty, 2019-08-08 From post truth politics to no platforming on university campuses the English language has been both a potent weapon and a crucial battlefield for our divided politics In this important and wide ranging intervention Thomas Docherty explores the politics of the English language its implication in the dynamics of political power and the spaces it offers for dissent and resistance From the authorised English of the King James Bible to the colonial project of University English Studies this book develops a powerful history for contemporary debates about propaganda free speech and truth telling in our politics Taking examples from the US UK and beyond from debates about the Second Amendment and free speech on campus to the Iraq War and the Grenfell Tower fire this book is a powerful and polemical return to Orwell s observation that a degraded political language is intimately connected to an equally degraded political culture

Elad Lapidot presents the notion of politics as logoclassm through readings of five canonic thinkers of the twentieth century Carl Schmitt Martin Heidegger Frantz Fanon Gayatri Spivak and Jacques Derrida Tracing the development of the politics of not speaking from the 1930s to the 1990s he shows how the notion of logoclassm the rupture of rational discussion explains key notions in modern politics such as sovereignty law the state violence war race colonialism decolonization and boycott and sheds light on current debates concerning the Boycott Divestment Sanctions BDS movement and the Gaza war

Constitutional Law and Politics of Secession Antoni Abat i Ninet, 2023-07-31 This collection presents an analysis of the concept of secession and its constitutional accommodation alongside an assessment of the effects of secession in constitutional and international law The work proposes a new approach and insights into the existing literature that fill a gap from multidisciplinary and transdisciplinary perspectives The book approaches the topics of secession constitutionalism and their relationship from both theoretical and empirical perspectives including the analysis of particular secessionist examples such as Catalonia the Basque Country Tigray the Palestinian minority in Israel Bosnia and Herzegovina and the Mapuche Nation from a comparative constitutional perspective Elucidating these issues from different methodological and conceptual perspectives produces novelties in the scientific and constitutional debate The interplay between constitutions constitutional law and secession is indeed explored from philosophical socio legal but also from strict constitutional law outlooks Written by constitutional and public international law experts the book will be of interest to students academics and researchers working in the areas of constitutional law legal theory theory of the state philosophy of law and political science **State, Politics, and Social Classes** Armando Boito, 2023-03-24 This book offers a reassessment politics against the predominating economicist approach to historical materialism within contemporary Marxism Boito draws on the structural interpretation of Marxism inspired by Althusser's works of the mid 1960s and especially by Poulantzas Political Power and Social Classes The volume aims to demonstrate the role of the political dimension together with the economy and to a further extent to contribute to renew contemporary Marxist political theory The chapters cover topics such as the nature of political power the structure and functions of the state the role of politics in historical change political crises and the political formation of the working class The book highlights the role of political structures and practices in the reproduction of economic and social relations and also in the process of historical change The aim of the book is to contribute to the renewal of Marxist thought breaking with the economicist conception that dominated it throughout the last century and finally meeting the demands of the socialist struggle in the 21st century **South Africa, the Prospects of Peaceful Change** Theodor Hanf, Heribert Weiland, Gerda Vierdag, 1981 **The Saturday Review of Politics, Literature, Science and Art**, 1858 Language is Politics Frank van Splunder, 2019-11-27 Language is Politics discusses power relations between languages in the world with a particular focus on English Even though English is the most widely spoken and the most powerful language worldwide it is not the lingua franca it is often supposed to be The basic tenet of this book is that languages do not exist in the natural world

they are artefacts made by humans The book debunks some common myths about language and it suggests that we should be more modest in our assumptions for instance concerning the linguistic uniqueness of our own species The author argues in favour of an ecological or balanced approach to language This approach sees humans and other animals as part of the larger ecosystems that life depends on As in nature diversity is crucial to the survival of languages The current linguistic ecosystem is out of balance and this book shows that education can help to restore the balance and cope with the challenges of a multilingual and multicultural world With an ecological approach to language and a focus on narratives and personal language histories this will be key reading for researchers and academics as well as students of English language and linguistics

Piety, Politics, and Power David D. Grafton, 2009-03-16 From the time of Martin Luther's writing of *On War Against the Turk* in 1529 to American Lutheran military chaplains serving in the U S led invasion of Iraq in 2003 Lutheranism has had a symbiotic relationship with Islam in the Middle East framed across cultural and religious borders There have been those who have crossed these borders to engage in mission and dialogue In *Piety Politics and Power* David Grafton examines the origins of the American Lutheran missionary movement in the Middle East with a focus on its encounter with Muslims and the varied Lutheran theological responses toward Islam The narrative is placed within historical contexts to provide an overarching background of Middle Eastern history and Christian Muslim Relations The survey covers Lutheran missionary communities in Persia Iraq Egypt Lebanon and Jerusalem and the West Bank including the work of the Lutherans working for the American Board of Commissioners for Foreign Missionaries the Anglican Church Missionary Society the Lutheran Orient Mission the Lutheran Church Missouri Synod and the Evangelical Lutheran Church in America Whether enthusiastic Pietists seeking the conversion of Muslims and Jews cautious theologians in dialogue with Islam Judaism or Oriental Orthodoxy or social activists working on behalf of refugees in Egypt and the West Bank Grafton argues that these Christian missionaries were all enmeshed in the politics of the communities in which they lived and either contributed to or suffered from the realities of Middle Eastern and international politics Given the current reality of Pax Americana in the Middle East the author asks the driving question about the role of American Lutheran missions and Lutheran Middle Eastern Muslim dialogue in the age of American power in the Middle East

Political Liberalism John Rawls, 2005-06-04 Few aspects of American military history have been as vigorously debated as Harry Truman's decision to use atomic bombs against Japan In this carefully crafted volume Michael Kort describes the wartime circumstances and thinking that form the context for the decision to use these weapons surveys the major debates related to that decision and provides a comprehensive collection of key primary source documents that illuminate the behavior of the United States and Japan during the closing days of World War II Kort opens with a summary of the debate over Hiroshima as it has evolved since 1945 He then provides a historical overview of the events in question beginning with the decision and program to build the atomic bomb Detailing the sequence of events leading to Japan's surrender he revisits the decisive battles of the Pacific War and the motivations of American and Japanese

leaders Finally Kort examines ten key issues in the discussion of Hiroshima and guides readers to relevant primary source documents scholarly books and articles *The Language(s) of Politics* Nils Ringe, 2022-01-19 Multilingualism is an ever present feature in political contexts around the world including multilingual states and international organizations Increasingly consequential political decisions are negotiated between politicians who do not share a common native language Nils Ringe uses the European Union to investigate how politicians reliance on shared foreign languages and translation services affects politics and policy making Ringe s research illustrates how multilingualism is an inherent and consequential feature of EU politics that it depoliticizes policy making by reducing its political nature and potential for conflict An atmosphere with both foreign language use and a reliance on translation leads to communication that is simple utilitarian neutralized and involves commonly shared phrases and expressions Policymakers tend to disregard politically charged language and they are constrained in their ability to use vague or ambiguous language to gloss over disagreements by the need for consistency across languages
