Rodríguez, 2015-06-04 This book discusses current market based educational discourses and how they have undermined the notion of the public in public education by allowing private visions of education to define the public democratic imagination Against this discouraging background this text embraces Freire's understanding of hope as an ontological need and calls for finding new public grounds for our public imagination It further articulates Freire's mandate to unveil historically concrete practices to sustain democratic educational visions no matter how difficult this task may be by 1 presenting an indepth description of the pedagogies and curriculums of eleven schools across historical and geographical locations that have worked or are still working with disenfranchised communities and that have publicly hoped for a better future for their students and by 2 reflecting on how the stories of these schools offer us new opportunities to rethink our own pedagogical commitment to public visions of education To promote this reflection this book offers the notion of publicly imagined public education as a conceptual tool to help understand the historical and discursive specificity of schools hopes and to re claim public schools as legitimate sites of public imagination Samuel Johnson Lawrence Lipking, 2009-07-01 He was a servant to the public a writer for hire He was a hero an author adding to the glory of his nation But can a writer be both hack and hero The career of Samuel Johnson recounted here by Lawrence Lipking proves that the two can be one And it further proves in its enduring interest for readers that academic fashions today may be a bit hasty in pronouncing the death of the author A book about the life of an author about how an author is made not born Lipking's Samuel Johnson is the story of the man as he

lived and lives in his work Tracing Johnson's rocky climb from anonymity to fame in the course of which he came to stand for both the greatness of English literature and the good sense of the common reader the book shows how this life transformed the very nature of authorship Beginning with the defiant letter to Chesterfield that made Johnson a celebrity Samuel Johnson offers fresh readings of all the writer's major works viewed through the lens of two ongoing preoccupations the urge to do great deeds and the sense that bold expectations are doomed to disappointment Johnson steers between the twin perils of ambition and despondency Mounting a challenge to the emerging industry that glorified and capitalized on Shakespeare he stresses instead the playwright's power to cure the illusions of everyday life All Johnson's works reveal his extraordinary sympathy with ordinary people In his groundbreaking Dictionary in his poems and essays and in *The Lives of the English Poets* we see Johnson becoming the key figure in the culture of literacy that reaches from his day to our own

Liberating the Economy from the Market Leonardo Lavanderos,Alejandro Malpartida,2025-04-24 Authors Leonardo Lavanderos and Alejandro Malpartida dismantle the ideological scaffolding of contemporary capitalism exposing its structural contradictions and radical disconnection from the conditions that sustain life This book is not merely a critique it deconstructs and reconfigures proposing an economy that transcends the reductionist mechanics of supply and demand in order to restore the essential link between culture and nature The authors discuss how conventional economics obsessed with abstract metrics and empty indicators erased the relational and ecological dimensions that underpin the viability of both human and non human communities The book is an intellectual rebuff to those who have turned the economy into a machine of entropy uprooting and devastation Drawing from the concept of ecopoiesis the authors call for a paradigmatic shift toward a regenerative relational and systemically sustainable economy An essential text for students and researchers in economics sustainability sociology and societal futures

Politics of Catastrophe Claudia Aradau, Rens Van Munster, 2011-05-02 This book argues that catastrophe is a particular way of governing future events such as terrorism climate change or pandemics which we cannot predict but which may strike suddenly without warning and cause irreversible damage At a time where catastrophe increasingly functions as a signifier of our future imaginaries of pending doom have fostered new modes of anticipatory knowledge and redeployed existing ones Although it shares many similarities with crises disasters risks and other disruptive incidents this book claims that catastrophes also bring out the very limits of knowledge and management The politics of catastrophe is turned towards an unknown future which must be imagined and inhabited in order to be made palpable knowable and actionable Politics of Catastrophe critically assesses the effects of these new practices of knowing and governing catastrophes to come and challenges the reader to think about the possibility of an alternative politics of catastrophe This book will be of interest to students of critical security studies risk theory political theory and International Relations in general

Reclaiming the Imagination Through Science Karyn L. Pallay, 2006 This thesis attempts to reclaim the imagination defined by Ann Berthoff as the name for the active mind by looking at brain biology as it relates to teaching and learning The section titled Keeping Biology in Mind The Brain as Speculative Instrument demonstrates how biological naturalism a philosophy developed by John Searle validates the concept of an ontologically subjective I and hence the creation of course materials based on David Kolb's experiential learning model In addition it discusses how biologist James Zull maps the actual structure of the brain onto Kolb's model Adding to this bottom up theory of learning that emphasizes brain biology and subjective experience this thesis discusses how the mind through mental force works in a top down fashion to change the brain and suggests that students can learn to take control of their own learning by applying mental force The section titled Keeping Affect in Mind The Biology of Intuition presents the aspect of affect known as intuition and how it fits into the discussion The main premise of this thesis is that we can employ concepts of the brain and learning in the composition classroom to facilitate the teaching and learning of writing The last section titled Keeping Composition in Mind Theory into Practice is devoted to this premise on a practical level
