The book's central argument is that we need to include the decorative in the study of sculpture in order to present a more accurate and comprehensive account of the practice and profession of sculpture in this period. Drawing on new archival sources, sculptors and objects, this is the first sustained study of how and

why French sculptors collaborated with state and private luxury goods manufacturers between 1848 and 1895 Organised chronologically the book identifies three historically situated frameworks through which sculptors attempted to validate themselves and their work in relation to industry industrial art decorative art and objet d art Detailed readings are offered of sculptors who operated within and outside the Salon including S n Ch t Carrier Belleuse and Rodin and of diverse objects and materials from S es vases to pewter plates by Desbois and furniture by Barbedienne and Carabin By contesting the false separation of art from industry Claire Jones s study restores the importance of the sculptor manufacturer relationship and of the decorative to the history of sculpture The Central Liberal Truth Lawrence E. investigations into new innovations and scientific development such as the steam engine transportation and engineering the microscope spirit photography and the orrery as well as how this new technology is reproduced in illustrated periodicals The essays also look at more traditional forms of creative expression to show that the same concerns and anxieties about science technology and the changing perceptions of the natural world can be seen in the art of Armand Guillaumin Auguste Rodin Gustave Caillebotte and Camille Pissarro in colonial nineteenth century novels in design manuals in museums and in the decorations of domestic interior spaces *Visions of the Industrial Age 1830 1914* offers a thorough exploration of both the nature of modernity and the nature of the visual *Rodin* Albert E. Levkoff, 2000 The sculpture of Auguste Rodin has become such an important part of our visual culture that it seems to have been with us always The universal appeal of Rodin s work springs from its emotional expressiveness its astonishingly lifelike vitality and its passionate mirroring of the human condition With his impressionistic technique supported by a complete mastery of anatomical structure Rodin overthrew the reigning academic precepts of finish and symmetry By developing subjects beyond traditional allegories he pointed the way to sheer abstraction in the twentieth century This handsomely illustrated catalogue publishes for the first time in its entirety a major American collection of sculpture the Cantor gifts to the Los Angeles County Museum of Art and provides a rich context for Rodin s own work It presents sculpture by Rodin s most important nineteenth century forerunners Jean Baptiste Carpeaux Albert Ernest Carrier Belleuse Fran ois Rude and others as well as work by the contemporaries he admired those with whom he competed those he influenced and those who moved from his orbit to develop their own styles at the dawn of the twentieth century But the centerpiece of the book remains Rodin forty two works by the most influential sculptor of the modern period all specially photographed and many shown in multiple views Publisher description *The Studio* , 1901 *Translation and the Arts in Modern France* Sonya Stephens, 2017-07-10 *Translation and the Arts in Modern France* sits at the intersection of transposition translation and ekphrasis finding resonances in these areas across periods places and forms Within these contributions questions of colonization subjugation migration and exile connect Benin to Brittany and political philosophy to the sentimental novel and to film Focusing on cultural production from 1830 to the present and privileging French culture the contributors explore interactions with other cultures countries and continents often explicitly equating intercultural permeability with representational exchange In doing so the book exposes the extent to which moving between media and codes the very process of translation and transposition is a defining aspect of creativity across time space and disciplines
