Nursing Foundation Procedure Ms. Aakanksha, M. Amala Seeli, Ms. Dharini Parmar, Mrs. Neelofur Ibran Ali, Mrs. Shikha Gupta, 2023-08-10 Nurses are critical in the delivery of essential health services and are core in strengthening the health system They bring people centred care closer to the communities where they are needed most thereby helping improve health outcomes and the overall cost effectiveness of services Communication skills for nurses are essential but may be difficult to master Communication is the exchange of information between people by sending and receiving it through speaking writing or by using any other medium Nurses speak to people of varying educational cultural and social backgrounds and must do so in an effective caring and professional manner especially when communicating with

patients and their families The quality of communication in interactions between nurses and patients has a major influence on patient outcomes This influence can play a very important role in areas such as patient health education and adherence Therapeutic and non therapeutic communication in nursing are opposites of one another Therapeutic nursing communication promotes good nurse patient relationships and can help improve patient satisfaction and outcomes Therapeutic communication in nursing can lead to a deeper insight into the patient s ability to care for himself his perception of the reality of his health situation and any other issues that need to be addressed Conversely non therapeutic communication can lead to miscommunication between the nurse patient and other healthcare team members Non therapeutic communication in nursing can hinder effective patient care lead to errors or omissions in care and have legal consequences if the patient is injured as a result of poor communication
