This combination of technical background information and the hands-on approach brings the science down to earth with a practical method to plan for success. Features include: Over 400 images, graphs and tables to illustrate these concepts. A wide range of hardware to be used including smartphones, tablets and the latest mount technologies. How to utilize a variety of leading software such as Maxim DL, Nebulosity, Sequence Generator Pro, Photoshop and PixInsight. Case studies showing how and when to use certain tools and overcoming technical challenges. How sensor performance and light pollution relate to image quality and exposure planning.
