3. What do we mean by a "period" of elements?

**On the periodic table, periods are the rows (going left to right). Elements in the same period have the same number of shells, but are not similar in properties.**

4. Name the first and last element in period 3. Sodium and Argon

5. What is special about the group of noble gases?

**Noble gases have a complete outer shell (maximum number of valence electrons in their valence shell). Because of this, they do not give, take, or share electrons with other atoms. They are very unreactive.**
