*Modern Web Development with Go* Dušan Stojanović, 2023-03-02 Build fast scalable web server applications by harnessing the power of solution driven programming with Go

**KEY FEATURES** Understanding the core concepts of the Go programming language Designing and development of modern Web Server applications Dealing with different kinds of database management solutions Deploying applications with cutting edge technologies Monitoring and maintenance of applications with popular tools

**DESCRIPTION** In this book we are going to learn how to design develop and deploy Web Server Applications using the Go programming language In recent years Go has become the industrial standard for these kinds of applications so by learning this a lot of good opportunities can be opened in the market All subjects will be covered through various practical examples This book will cover the state of the art technology for the development of Web Applications and follow all industrial standards At the beginning we will do the preparation for development Here we will learn the basics of the Go programming language the basics of Web Servers how to set up a project with Go and how to design software solutions Later we will concentrate more on development We will learn how to develop the application designed in the previous chapters how to use different types of databases how to test our application and how to make it secure At the end of the book we will show how to deploy the application and monitor it after deployment After reading this book the readers can independently develop Web Server Applications or include themselves in already started projects

**WHAT WILL YOU LEARN** Solve common problems with the Go programming language Be familiar with the terms related to server applications Understand the phases in the software development process Be able to independently design software solutions and use some best practices Be familiar with multiple different database management solutions relational and NoSQL and be able to predict which best suits their needs Learn how to deploy applications Understand and know how to apply monitoring and alerting concepts

**WHO THIS BOOK IS FOR** The book is for beginners and experienced developers who want to learn and have a thorough introduction to web development using the Go programming language With a lot of practical examples and guidelines on how to install and configure specific tools beginners will easily understand and follow the content covered in this book On the other hand more experienced developers will certainly find some useful tips and tricks

**TABLE OF CONTENTS** 1 Basic Concepts of Go programming language 2 Advanced Concepts of Go programming language 3 Web Servers 4 Setting up a project with Go programming language 5 Design of Web Applications 6 Application layers 7 Relational databases and Repository layer 8 NoSQL databases and Repository layer 9 Testing 10 Security 11 Deploying Web Application 12 Monitoring and Alerting

*Personal Best* Margaret Watson, 2013-11-30 The minute Tess Phillips crossed the finish line in the Chicago Marathon her life began to change As the female winner in this year's race she was handed a check for fifty thousand dollars The money would keep her fledgling recycling business afloat for awhile but there was one catch If she wanted to keep the money she had to let a local sports writer shadow her for an entire week

Although Tess didn't mind sharing her training tips she couldn't afford to have a reporter prying into her personal life Especially a reporter like Nick Bartholomew With his mocking grin his aggressive style and his intense blue eyes Nick wouldn't let one detail slip by Once Nick started nosing around Tess's business problems were sure to leak out She had to avoid him even if he was the most attractive man she'd ever met From the start Nick Bartholomew was not pleased with this assignment He was sure that Tess Phillips was a complete fraud No one could win a marathon on their first try But one look at Tess's clear blue eyes made Nick doubt his reporter's instincts They weren't the eyes of a hustler They were too trusting too vulnerable If a man stared into Tess Phillips's eyes long enough he would begin to believe in all sorts of fairy tales Before he lost his objectivity Nick had to cut to the chase It was time to uncover Tess's secret and he was the best man for the job Margaret Watson a star in the world of contemporary romance grabs you on the opening page and keeps you reading to the happily ever after New York Times bestselling author Susan Elizabeth Phillips *Advancing Sports and Exercise via Innovation* Garry Kuan, Yu-Kai Chang, Tony Morris, Teo Eng Wah, Rabi'u Muazu Musa, Anwar P. P. Abdul Majeed, 2023-05-31 This book presents the proceedings of the 9th Asian South Pacific Association of Sport Psychology International Congress ASPASP 2022 Kuching Malaysia which entails the different sporting innovation themes namely Applied Sport and Social Psychology Health and Exercise Motor Control and Learning Counselling and Clinical Psychology Biomechanics Data Mining and Machine Learning in Sports amongst others It presents the state of the art technological advancements towards the aforesaid themes and provides a platform to shape the future direction of sport science specifically in the field sports and exercise psychology **Ultimate Genetic Algorithms with Python** Indrajit Kar, Zonunfeli Ralte, 2025-09-22 TAGLINE Harness Genetic Algorithms to Build the Next Generation of Adaptive AI KEY FEATURES Step by step tutorials on Genetic Algorithms using PyGAD and DEAP Real world Genetic Algorithm applications in ML DL NLP CV and RL Advanced coverage of evolutionary and metaheuristic algorithms Integration of Genetic Algorithms with generative and agent based AI systems DESCRIPTION Genetic Algorithms GAs are nature inspired optimization tools that help AI systems adapt improve and solve complex problems efficiently Ultimate Genetic Algorithms with Python explains elaborately the fundamentals of GAs to practical Python based implementation using PyGAD and DEAP The book starts with a solid foundation explaining how evolutionary principles can be applied to optimization tasks search problems and model improvement You will also explore GA applications across multiple AI domains optimizing machine learning workflows evolving neural network architectures in deep learning enhancing feature selection in NLP improving performance in computer vision and guiding exploration strategies in reinforcement learning Each application chapter includes step by step coding examples performance comparisons and tuning techniques The later sections focus on advanced metaheuristics swarm intelligence and integrating GAs with generative and agent based AI systems You will also learn how to design self evolving multi agent frameworks leverage swarm based methods and connect GAs to next gen AI architectures such as Model Context Protocols MCP Thus by

the end of the book you will have developed all the skills to design implement and scale GA driven solutions for real world AI challenges Hence evolve your AI solutions start building with Genetic Algorithms today WHAT WILL YOU LEARN Master the fundamentals and components of Genetic Algorithms Implement GAs in Python using PyGAD DEAP and PyTorch Apply GAs for optimization feature selection and neural architecture search Enhance AI workflows in ML DL NLP CV and RL with GAs Explore metaheuristic and swarm based algorithms for complex problem solving Integrate GAs into generative multi agent and self evolving AI systems WHO IS THIS BOOK FOR This book is tailored for data scientists AI ML engineers researchers and advanced students aiming to apply Genetic Algorithms to real world AI challenges It is also best suited for professionals in optimization generative AI and agent based systems Readers should have basic Python programming skills and foundational knowledge of machine learning concepts Hence whether you are a beginner seeking a solid foundation or an experienced practitioner aiming to deepen your expertise in evolutionary computation this handbook provides a practical and in depth resource to enhance your skills and deliver impactful AI solutions

Female Masculinity Jack Halberstam,2019-01-05 In this quintessential work of queer theory Jack Halberstam takes aim at the protected status of male masculinity and shows that female masculinity has offered a distinct alternative to it for well over two centuries Demonstrating how female masculinity is not some bad imitation of virility but a lively and dramatic staging of hybrid and minority genders Halberstam catalogs the diversity of gender expressions among masculine women from nineteenth century pre lesbian practices to contemporary drag king performances Through detailed textual readings as well as empirical research Halberstam uncovers a hidden history of female masculinities while arguing for a more nuanced understanding of gender categories that would incorporate rather than pathologize them He rereads Anne Lister s diaries and Radclyffe Hall s *The Well of Loneliness* as foundational assertions of female masculine identity considers the enigma of the stone butch and the politics surrounding butch femme roles within lesbian communities and explores issues of transsexuality among transgender dykes lesbians who pass as men and female to male transsexuals who may find the label of lesbian a temporary refuge Halberstam also tackles such topics as women and boxing butches in Hollywood and independent cinema and the phenomenon of male impersonators Featuring a new preface

by the author this twentieth anniversary edition of *Female Masculinity* remains as insightful timely and necessary as ever

*Mastering Search Algorithms with Python* Pooja Baraskar, Abhishek Nandy, 2024-07-20. **DESCRIPTION** In today's era of Artificial Intelligence and the vast expanse of big data, understanding how to effectively utilize search algorithms has become crucial. Every day, billions of searches happen online, influencing everything from social media recommendations to critical decisions in fields like finance and healthcare. Behind these seemingly straightforward searches are powerful algorithms that determine how information is discovered, organized and applied, fundamentally shaping our digital interactions. This book covers various search algorithms, starting with linear and binary searches, analyzing their performance and implementing them in Python. It progresses to graph traversal algorithms like DFS and BFS, including Python examples and explores the A\* algorithm for optimal pathfinding. Advanced search techniques and optimization best practices are discussed along with neural network applications like gradient descent. You will also learn to create interactive visualizations using Streamlit and explore real-world applications in gaming, logistics and Machine Learning. By the end, readers will have a solid grasp of search

algorithms enabling them to implement them efficiently in Python and tackle complex search problems with ease

**KEY FEATURES** Comprehensive coverage of a wide range of search algorithms from basic to advanced Hands on Python code examples for each algorithm fostering practical learning Insights into the real world applications of each algorithm preparing readers for real world challenges

**WHAT YOU WILL LEARN** Understand basic to advanced search algorithms in Python that are crucial for information retrieval Learn different search methods like binary search and A search and their pros and cons Use Python's visualization tools to see algorithms in action for better understanding Enhance learning with practical examples challenges and solutions to boost programming skills

**WHO THIS BOOK IS FOR** This book is for software engineers data scientists and computer science students looking to master search algorithms with Python to optimize search algorithms in today's data driven environments

**TABLE OF CONTENTS** 1 Introduction to Search Algorithms 2 Linear and Binary Search 3 Depth Search and Breadth First Search 4 Heuristic Search Introducing A Algorithm 5 Advanced Search Algorithms and Techniques 6 Optimizing and Benchmarking Search Algorithms 7 Search Algorithms for Neural Networks 8 Interactive Visualizations with Streamlit 9 Search Algorithms in Large Language Models 10 Diverse Landscape of Search Algorithms 11 Real World Applications of Search Algorithms

**Global Perspectives in Positive Education** Rob Stokoe, 2018-07-18 The common goal of the contributing authors in this publication is to engage learn from and share success in order to energise the positive education movement for the benefit of our young people This is the greatest contribution we can make to the future of our global society and the wellbeing of its citizens We all seek to offer to everyone the potential to achieve success to be purposeful and content contributing positively to their own wellbeing and that of others Presenting at conferences across Australia Singapore Dubai and the UK has offered a unique insight in to the breadth and quality of Positive Education globally The positive education community encompasses a dedicated and selfless group of individuals researchers practitioners and leaders who are doing great things to help more young people to grow as robust individuals and learners Yet all too often we fail to join the dots to connect the passion and expertise of our global community to share the best of what we do and what we think Sharing are expertise passion and enthusiasm is essential if we are to truly support our young people The International Positive Education Network IPEN was established in 2014 to promote these values and sharing of insight and expertise Its mission being to promote academics alongside character and wellbeing to connect people and to share best practice worldwide The commitment to these values are exemplified by the writers who have kindly offered their expertise for the good of others from Dr Helen Street Australia to Yukun Zhao in China and Professor Leonid Illushin in Russia Other chapters have come from Dr Abdullah Al Karam KHDA Dubai Professor Andrew Martin Australia and Amba Brown in Singapore
