Super Power, Spooky Bards, and Silverware Dominic Arsenault, 2025-10-28 How the Super Nintendo Entertainment System embodied Nintendo's resistance to innovation and took the company from industry leadership to the margins of videogaming This is a book about the Super Nintendo Entertainment System that is not celebratory or self congratulatory Most other accounts declare the Super NES the undisputed victor of the 16 bit console wars of 1989-1995 In this book Dominic Arsenault reminds us that although the SNES was a strong platform filled with high quality games it was also the product of a short sighted corporate vision focused on maintaining Nintendo's market share and business model This led the firm to fall from a dominant position during its golden age dubbed by Arsenault the ReNESSance with the NES to the margins of the industry with the Nintendo 64 and GameCube consoles Arsenault argues that Nintendo's conservative business strategies and resistance to innovation during the SNES years explain its market defeat by Sony's PlayStation Extending the notion of platform to include the marketing forces that shape and constrain creative work Arsenault draws not only on game studies and histories but on game magazines boxes manuals and advertisements to identify the technological discourses and business models that formed Nintendo's Super Power He also describes the cultural changes in video games during the 1990s that slowly eroded the love of gamer enthusiasts for the SNES as the Nintendo generation matured Finally he chronicles the many technological changes that occurred through the SNES's lifetime including full motion video CD-ROM storage and the shift to 3D graphics Because of the SNES platform's architecture Arsenault explains Nintendo resisted these changes and continued to focus on traditional gameplay genres

Reimagining the Academic Library David W. Lewis, 2016-05-04 Academic libraries are in the midst of significant disruption Academic librarians and university administrators know they need to change but are not sure how Bits and pieces of what needs to happen are clear but the whole picture is hard to grasp Reimagining the Academic Library paints a simple straightforward picture of the changes affecting academic libraries and what academic librarians need to do to respond to the changes would help to guide future library practice The aim is to explain where academic libraries need to go and how to get there in a book that can be read in a weekend David Lewis provides a readable survey of the current state of academic library practice and proposes where academic libraries need to go in the future to provide value to their campuses His primary focus is on collections as this is the area with the greatest opportunity for change and is the driver of most library cost Lewis provides an accessible framework for thinking about how library practice needs to adjust in the digital environment The book will be useful not only to academic librarians but also for librarians to share with presidents and provosts who a concise source for understanding where and how to focus their expenditures on libraries

Paramei, Cees van Leeuwen, 2016-05-31 Starting from psychophysics over the last 50 years most progress in unravelling the mechanisms of color vision has been made through the study of single cell responses mainly in LGN and striate cortex A similar development in the study of form perception may seem to be underway centred on the study of temporal cortex However because of the combinatorial characteristics of form perception we are also observing the opposite tendency from single cell activity to population coding and from static receptive field structures to system dynamics and integration and ultimately a synthetic form of psychophysics of color and form perception From single cells to system integration it is this development the present Research Topic wishes to highlight and promote How does this development affect our views on the various attributes of perception In particular we are interested in to what extent evolving knowledge in the field of color perception is relevant within a developing integrative framework of form perception The goal of this Research Topic is to bring together experimental research encompassing both color and form perception For this volume we planned a broad scope of topics on color in complex scenes color and form as well as dynamic aspects of form perception We expect that the Research Topic will be attractive to the community of researchers whose work straddles the boundary between the two visual perception fields as well as to the wider community interested in integrative systems neuroscience
