Planting A New Perspective:

Planting Noel Kingsbury, Piet Oudolf, 2013-04-09 *Planting A New Perspective* is an essential resource for designers and gardeners looking to create plant rich beautiful gardens that support biodiversity and nourish the human spirit. An intimate knowledge of plants is essential to the success of modern landscape design and *Planting* makes Oudolf's considerable understanding of plant ecology and performance accessible, explaining how plants behave in different situations, what goes on underground and which species make good neighbors. Extensive plant charts and planting plans will help you choose plants for their structure, color and texture as well as the way they perform in the landscape. A detailed directory with details like each plant's life expectancy, the persistence of its seedheads, its tendency to spread and propensity to self seed, this book is a beautiful and invaluable resource.

Hummelo Piet Oudolf, Noel Kingsbury, 2021-03-09 An intimate look at the personal garden of the Dutch landscape designer renowned for his plantings at the High Line in New York City and Lurie Garden at Chicago's Millennium Park. *Hummelo* near the village of the same name in Gelderland in the eastern Netherlands is visited by thousands of gardeners seeking inspiration each year. It is Piet Oudolf's home, his personal garden laboratory, a former nursery run by his wife Anja and the place where he first tested new designs and created the new varieties of perennials that are now widely available. A follow up to Oudolf's successful *Landscapes*, *Hummelo* tells the story of how the garden has evolved over the past three decades since Oudolf, Anja and their two young sons moved onto the property with its loamy sand and derelict wood stove heated farmhouse in 1982. Text by noted garden author and longtime personal friend Noel Kingsbury places *Hummelo* in context within gardening history from The Netherlands counterculture and nascent green movement of the 1960s to prairie restoration in the American Midwest and shows how its development has mirrored that of Oudolf's own outstanding career and unique naturalistic aesthetic. Oudolf has long been at the forefront of the Dutch Wave and New Perennial Style movements in garden design which have ecological considerations at their base. His work stresses a deep knowledge of plants, eschewing short lived annuals in favor of perennials that can be appreciated for both structure and blooms in every season. He is credited for leading the way to today's focus on sustainability in garden design. The book will appeal to readers who favor beautiful, biodiverse and ever changing plantings, seed heads, grasses, sedges and winter silhouettes. They will be drawn into its pages by lush photography often demonstrating how Oudolf views his own work and providing rare glimpses into his daily life. Short essays highlight important techniques including scatter plants and matrix planting and introduce other famed landscape designers: Karl Foerster, Henk Gerritsen, Rob Leopold, Ernst Pagels and Mien Ruys to create a full panorama of the movement. Oudolf now leads.

Planting Design Patrick Mooney, 2019-10-30 Landscape designers have long understood the use of plants to provide beauty, aesthetic pleasure and visual stimulation while supporting a broad range of functional goals. However, the potential for plants in the landscape to elicit human involvement and provide mental stimulation and restoration is much less well understood. This book meshes the art of

planting design with an understanding of how humans respond to natural environments Beginning with an understanding of human needs preferences and responses to landscape the author interprets the ways in which an understanding of the human environment interaction can inform planting design Many of the principles and techniques that may be used in planting design are beautifully illustrated in full colour with examples by leading landscape architects and designers from the United Kingdom Europe North America and Asia including Andrea Cochran Andrea Cochran Landscape Architecture San Francisco CA Design Workshop Inc Richard Hartlage Land Morphology Seattle WA Shunmyo Masuno Japan Landscape Consultants Ltd Yokohama Piet Oudolf Hummelo The Netherlands Melody Redekop Vancouver Christine Ten Eyck Ten Eyck Landscape Architects Inc Austin TX Kongjian Yu Turenscape Ltd Beijing The book stimulates thought provides new direction and assists the reader to find their own unique design voice Because there are many valid processes and intentions for landscape design the book is not intended to be overly prescriptive Rather than presenting a strict design method and accompanying set of rules Planting Design provides information insight and inspiration as a basis for developing the individual designer s own expression in this most challenging of art forms *The Planting Design Handbook* Nick Robinson,2020-09-10 Since the first edition was published in 1992 Nick Robinson s *The Planting Design Handbook* has been widely used as a definitive text on landscape architecture courses throughout the world It remains one of the few titles written by a practicing landscape architect and educator who is also a horticulturalist and accomplished plantsman and which deals with the application of planting design on a large scale in landscape architecture and urban design projects The *Planting Design Handbook* is distinctive for its elegant integration of an ecological approach with an understanding of visual and spatial composition It emphasizes the role of vegetation layers and designed plant communities in complex and diverse plant assemblages for all kinds of sites and uses This expanded and comprehensively updated third edition still provides a complete examination of principles and practice of design for public institutional and private landscapes It takes account of developments in theory and practice especially in the use of perennials and reflects a variety of media and approaches current in landscape architecture and design All chapters have been revised and re written to ensure updated references and new references have been added Many new photographs of planting and projects around the world have been included with examples of current professional drawings to illustrate the design process It is generously illustrated including a colour section and the beautifully detailed line drawings of the Chinese architect and painter Jia Hua Wu *Planting in a Post-Wild World* Thomas Rainer,Claudia West,2016-02-04 This post wild landscape guide is an optimistic call to action to help gardeners create a harmonious environment by incorporating plant communities Chicago Tribune Over time with industrialization and urban sprawl we have driven nature out of our neighborhoods and cities But we can invite it back by designing landscapes that look and function more like they do in the wild robust diverse and visually harmonious Featuring gorgeous photography and advice for landscapers *Planting in a Post Wild World* by Thomas Rainer and Claudia West is
