Globalisation and African Languages Katrin

Bromber, Birgit Smieja, 2011-07-20 Globalisation and African Languages links African language studies to the concept of globalisation which increasingly undergoes critical review Hence African linguists of various provenience can make valuable contributions to this debate In cultural matters which by definition include language there is often a sense that globalisation leads to a major trend of homogenisation which results in a reduction of diversity on the one hand and on the other in new themes being incorporated into global cultural patterns However often conflicting and overlapping particularistic interests exist which have a constructive as well as destructive potential This aspect leads directly to the first of three sections of this volume LANGUAGE USE AND ATTITUDES which addresses some of the burning issues in sociolinguistic research Since this research area is tightly linked to the educational domain these important issues are addressed in articles that comprise the second section of this volume LANGUAGE POLICY AND EDUCATION The third section of the volume presents articles dealing with LANGUAGE DESCRIPTION AND CLASSIFICATION demonstrating which parts of different language systems are affected through contact under historical and modern conditions The contributions of all the well known scholars in this

volume show that globalisation is a two way street and to ensure that all sides benefit in a reciprocal manner means the impacts have to be monitored globally regionally nationally and locally By disseminating and emphasising these linguistic findings as part of the global cultural heritage African language studies may offer urgently needed new perspectives towards a rapidly changing world

Translation Classics in Context Paul F. Bandia, James Hadley, Siobhán McElduff, 2024-07-31 Translation Classics in Context carefully considers the relationship between translation and the classics. It presents readers with revelatory and insightful case studies that investigate translations produced as part of nexuses of colonial resistance and liberation across Africa and in Ireland, translations of novels and folklore collections that influence not just other fictions but stage productions, and entire historical disciplines, struggles over Ukrainian and Russian literature, and how it is shaped and transferred, and the role of the academy and the curriculum in creating notions of classic translations. Along the way, it covers oral poetry, saints, scholars, Walter Scott, and Jules Verne, not to mention Leo Tolstoy and the Corpse Bride making her way from folklore to *Frankenstein* and into the world of Disney animation. Contributors are all leading scholars, and the book is accessible and engaging, assuming no specialist knowledge.
