Problem-Based Learning for Health Improvement John Cornell, Frada Eskin, 2018-10-08 Improving the health of the population requires a public health perspective We have written this book to demonstrate its nature Improving the population's health is the occupational raison d'être of public health professionals However because the population's health is affected by all facets of society's activities see Figure A possessing a public health perspective is relevant to a wide variety of other professions and disciplines Although doctors and nurses social workers teachers etc work with individuals this book provides new insights for them to consider individuals within the wider context and offers increased possibilities for problem solving For example poor living conditions adversely affect school work dysfunctional families militate against a patient's recovery and fear of violence on a housing estate limits the social life of an older person which in turn creates isolation loneliness and health deterioration Given this broader perspective the solution to a problem

may lie in improving the wider environment rather than focusing on the symptoms exhibited by the individual Taking a public health perspective therefore increases the opportunities for improving the population s health and well being We aim to demonstrate to readers through practical examples the network of knowledge and skills required to tackle the challenges that daily confront all professionals concerned with people s health Each chapter is devoted to exploring one of the ten areas of public health competence as defined by the Faculty of Public Health Medicine 1 This has been achieved using a problem based self directed learning model Each of the chapter authors was given a broad brief but with some leeway and licence in how they presented their work This reflects the reality of public health practice Foreward

Evidence-Based Public Health Ross C. Brownson,2011-01-13 The authors deal not only with finding and using scientific evidence but also with implementation and evaluation of interventions that generate new evidence on effectiveness Each chapter covers the basic issues and provides multiple examples to illustrate important concepts
