teaching English with instructional value and that students enjoy working with pop songs The theoretical part of this diploma project is based on relevant sources of background literature In the first two chapters the use of songs is described with regard to motivation and the Multiple Intelligences Theory The third and fourth chapter deal with the reasons for using songs and their classification In the last two chapters of the theoretical part pedagogical principles of using pop songs in class as well as the pros and cons of teaching through pop songs are presented The practical part is based on the findings of three surveys I have conducted in the field of using songs in the EFL classroom In the first part of the research I present an analysis of questionnaires which I distributed among English teachers at lower and upper secondary schools and grammar schools In the second part of the research I describe students attitudes to pop song based lessons which I taught during my teaching practice at grammar schools In the third part of the research I analyze the types of songs presented in commonly used textbooks at lower and upper secondary schools In addition I present a self developed teaching material containing a list of pop songs suitable for the EFL classroom In the last part of the practical part I answer the research questions and provide some implications for my own teaching

Program Governance Muhammad Ehsan Khan,2014-09-05 Although program management has received much attention in recent books program governance remains a relatively new subject While selected books and standards touch on this important topic few are devoted to program governance as a subject This book fills that need Program Governance provides a thorough understanding of governance while reviewing Projects, Government, and Public Policy Stanisław Gasik,2022-11-25 Many governments have effectively organized public project implementation systems in their jurisdictions At the same time many other countries remain at a less advanced level of public project management Globally there is a need for project management knowledge to be transferred between governments However no systematic review of these practices has been developed to date Projects Government and Public Policy was written to fulfill this need and presents a review of project management practices in countries with developed project based capabilities This book uses its own rigorous model to present this review systematically This book s practical purpose is to give a structured overview of government level project management practices This knowledge can be used in the work of governments to improve the management of public projects and the implementation of public policies Many professionals working in public institutions understand project management concepts differently than project management professionals Therefore this book begins with a chapter that describes the differences between the conceptual basis of public administration and project management The body of this book has five parts Part I is mainly intended for those involved in government and public administration who

want to acquire or increase knowledge about project management Part II provides an overview of the basic concepts from the theory of public administration public policies and development management Part III describes what makes public projects unique and the success factors specific to projects of this sector Knowledge about effective government project management practices is covered in Part IV The concluding Part V begins with a general overview of the maturity model concept Its main part covers the description of a maturity model showing ways to systematically improve the implementation of public projects This book is written for governments and government administrators including the most influential decision makers who craft policies to guide a country s development as well as how to implement projects This book is also intended for supporters and enthusiasts of project management in government and public administration by providing them with a description of the solutions used by project management in public administration This book is intended too for all project management practitioners working for public projects project managers team members sponsors and middle level executives of project delivering private companies By knowing public administration concepts they can manage their projects better and use a common language with their clients The Craft of Research, Third Edition Wayne C. Booth, Gregory G.

Colomb, Joseph M. Williams, 2009-05-15 With more than 400 000 copies now in print The Craft of Research is the unrivaled resource for researchers at every level from first year undergraduates to research reporters at corporations and government offices Seasoned researchers and educators Gregory G Colomb and Joseph M Williams present an updated third edition of their classic handbook whose first and second editions were written in collaboration with the late Wayne C Booth The Craft of Research explains how to build an argument that motivates readers to accept a claim how to anticipate the reservations of readers and to respond to them appropriately and how to create introductions and conclusions that answer that most demanding question So what The third edition includes an expanded discussion of the essential early stages of a research task planning and drafting a paper The authors have revised and fully updated their section on electronic research emphasizing the need to distinguish between trustworthy sources such as those found in libraries and less reliable sources found with a quick Web search A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers Throughout the authors have preserved the amiable tone the reliable voice and the sense of directness that have made this book indispensable for anyone undertaking a research project *How can the use of frequency information from corpora be used in foreign language teaching? A corpus-based study on vocabulary in course books* Karin

Dietiová, 2019-02-27 Diploma Thesis from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade A course Angli tina language English abstract How can corpora be used to improve vocabulary learning in language acquisition This thesis focuses on the use of word frequencies by teachers of English Teaching vocabulary to young learners is one of the most challenging responsibilities that teachers face The methodology chosen for the presentation of vocabulary is crucial for the learning success of the students There is a great amount of studies on how computers can

facilitate the learning of English as a foreign language EFL and with the development of immense corpora both teachers and students now have access to hundreds of millions of words and the possibility to explore their occurrence patterns This advantage is however rarely used in practice partly due to the relatively short existence of this discipline but most importantly due to the lack of information about corpora in English language teaching ELT This paper will present the concept of course book vocabulary and present word frequencies in learner s dictionaries The research part of this thesis deals with a linguistic analysis of data extracted from course books and their comparison with the Oxford list of 3000 essential words The aim of the thesis is to investigate the linguistic attributes of texts forming course books and to examine their relation

Encyclopedia of Language and Education G. Richard Tucker,P. Corson,2013-11-01 In many parts of the world it is common for a child to grow up speaking a local language at home another in the market place adding another to her repertoire as a lingua franca and then adding a language of wider communication such as English or French if she continues her formal schooling The contributions to the volume examine in some detail diverse aspects of second language education ranging from a focus on the basic contributions of linguistic theory and research to our understanding of second language learning and teaching on the one hand to a series of reviews of innovative language education practices in selected regions of the world on the other For the purposes of this volume second language education has been defined operationally to encompass education which occurs in those settings and situations in which a dominant language is offered as a second language e g ESL in England or the United States whether as a subject of study or a vehicle through which other material is studied as well as those cases in which an official but not necessarily dominant language is mandated e g French or English in certain parts of the Middle East or the Mahgreb The contributions also focus mainly albeit not exclusively on second language education for school aged learners

Second Language Education G. Richard Tucker,David Corson,1997 The contributions to the volume examine in detail diverse aspects of

second language education ranging from a focus on the basic contributions of linguistic theory and research to our understanding of second language learning and teaching on the one hand to a series of reviews of innovative language education practices in selected regions of the world on the other

Disease Control Priorities, Third Edition (Volume 3) Hellen Gelband, Prabhat Jha, Rengaswamy Sankaranarayanan, Susan Horton, 2015-10-29 Volume 3 Cancer presents the complex patterns of cancer incidence and death around the world and evidence on effective and cost effective ways to control cancers The DCP3 evaluation of cancer will indicate where cancer treatment is ineffective and wasteful and offer alternative cancer care packages that are cost effective and suited to low resource settings Main messages from the volume include Quality matters in all aspects of cancer treatment and palliation Cancer registries that track incidence mortality and survival paired with systems to capture causes of death are important to understanding the national cancer burden and the effect of interventions over time Effective interventions exist at a range of prices Adopting resource appropriate measures which allow the most effective treatment for the greatest number of people will be advantageous to countries Prioritizing resources toward early stage and curable cancers is likely to have the greatest health impact in low income settings Research prioritization is no longer just a global responsibility Providing cancer treatment requires adequate numbers of trained healthcare professionals and infrastructure beyond what is available in most LMICs especially low income countries Careful patient monitoring is a requirement of good quality cancer care and this often involves laboratory tests in addition to clinical examination Even if financing were immediately available to build or expand a cancer control system reaching capacity will take many years
