A corpus-based study on vocabulary in course books** Karin Dietiová, 2019-02-27 Diploma Thesis from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade A course Angli tina language English abstract How can corpora be used to improve vocabulary learning in language acquisition This thesis focuses on the use of word frequencies by teachers of English Teaching vocabulary to young learners is one of the most challenging responsibilities that teachers face The methodology chosen for the presentation of vocabulary is crucial for the learning success of the students There is a great amount of studies on how computers can facilitate the learning of English as a foreign language EFL and with the development of immense corpora both teachers and students now have access to hundreds of millions of words and the possibility to explore their occurrence patterns This advantage is however rarely used in practice partly due to the relatively short existence of this discipline but most importantly due to the lack of information about corpora in English language teaching ELT This paper will present the concept of course book vocabulary and present word frequencies in learner s dictionaries The research part of this thesis deals with a linguistic analysis of data extracted from course books and their comparison with the Oxford list of 3000 essential words The aim of the thesis is to investigate the linguistic attributes of texts forming course books and to examine their relation *Dementia* Robin C. Hilsabeck, Gayle Y. Ayers, 2024 Adults aged 65 and older are the fastest growing segment of the United States population This increase in older adults will result in a greater number of individuals with age related neurocognitive disorders such as Alzheimer s disease vascular disease and frontotemporal lobular degeneration Thus it is imperative that healthcare professionals are prepared to diagnose and manage mild cognitive impairment and dementia The purpose of this book is to provide trainees and early career professionals particularly in psychiatry psychology neurology geriatrics family medicine and internal medicine with the information necessary to care for the often complex clinical presentations of older adults with mild cognitive impairment and dementia The book is organized into three sections 1 core concepts 2 dementia syndromes and 3 disease management The chapters in section one focus on clinical knowledge and skills that can be applied across all

syndromes including conducting the diagnostic interview and neurologic examination frequently used cognitive screening measures neuropsychological assessment neuroimaging and developing differential diagnoses Chapters in section two review the most common syndromes mild cognitive impairment Alzheimer s disease vascular disease frontotemporal lobular degeneration Lewy body and Parkinson plus syndromes rare and rapidly progressive dementias and dementia due
