Amakomiti Trevor Ngwane, 2021-02-20 One of the most exciting and provocative books that I've read in a long time Mike Davis author of *Planet of the Slums* Can people who live in shantytowns shacks and favelas teach us anything about democracy About how to govern society in a way that is inclusive participatory and addresses popular needs This book argues that they can In a study conducted in dozens of South Africa's shack settlements where more than 9 million people live Trevor Ngwane finds thriving shack dwellers committees that govern local life are responsive to popular needs and provide a voice for the community These committees called amakomiti in the Zulu language organise the provision of basic services such as water sanitation public works and crime prevention especially during settlement establishment Amakomiti argues that contrary to common perception slum dwellers are in fact an essential part of the urban population whose political agency must be recognised and respected In a world searching for democratic alternatives that serve the many and not the few it is to the shantytowns rather than the seats of political power that we should turn

Academia: Intellectualisation and Empowerment through Formal Education Xolisa Tshongolo, 2024-12-02 To date there have been few comprehensive books published which deal specifically with the role of African languages in academia and formal education Motinyane Mletshe and Tshongolo as editors have produced a book that fills this gap In this timely collection of 21 chapters written in African languages and English the contributors offer a critique of both language practice in the classroom as well as language planning policy creation and implementation challenges A timely and innovative contribution in the area of language in education teaching pedagogy as well as multilingualism *In The Shadow of Mandela* Alexander Johnston, 2019-12-12 This outstanding and original work goes to the heart of South Africa's political problems doubts as to the sustainability of the post apartheid settlement beset with divisions in the ruling ANC factionalism corruption and the widening of fault lines in state and society The leadership issue has become key and this will be the first specific examination of leadership in the light of Mandela's legacy and its effect on his successor as potential and actual leaders all in the shadow of Mandela as the architect of the transition from apartheid to democracy and with overarching moral authority and international reputation Alexander Johnston shows how his successors are judged against Mandela's achievements including the potentially impressive lost leaders and concentrating on his immediate successors Thabo Mbeki and Jacob Zuma The book concludes with an in depth assessment of new president Cyril Ramaphosa's potential to be a leader for a new dawn This is an objective and critical work by a close observer who acknowledges the achievement of South African leadership but is acutely aware of the doubts as to the sustainability of South Africa's hard won democratic settlement An essential read for all readers interested in leadership and in the traumatic history and future of Africa's leading state as the continent rises to global importance The People's Zion Joel Cabrita, 2018-06-11 Joel Cabrita tells the story of Zionism which began in a utopian community near Chicago in 1900 Its faith healing spiritualism uplifting pan racialism and missionary zeal resonated with marginalized urban working class whites and blacks in both the United States and Southern Africa Today Zionism is Southern Africa's largest religious movement *Babel Unbound* Lesley

Cowling, Carolyn Hamilton, 2020-05-01 In this timely original and sophisticated collection writers from the Global South demonstrate that forms of publicness are multiple mobile and varied The notion that societies mediate issues through certain kinds of engagement is at the heart of imaginings of democracy and often centers on the ideal of the public sphere But this imagined foundation of how we live collectively appears to have suffered a dramatic collapse across the world with many democracies apparently unable to solve problems through talk or even to agree on who speaks in what ways and where In the 10 essays in this timely original and sophisticated collection writers from southern Africa combine theoretical analysis with the examination of historical cases and contemporary developments to demonstrate that forms of publicness are multiple mobile and varied They propose new concepts and methodologies to analyse how public engagements work in society Babel Unbound examines charged examples from the Global South such as the centuries old Timbuktu archive Nelson Mandela as a powerful absent presence in 1960s public life and the challenges to the terms of contemporary debate around the student activism of rhodesmustfall and feesmustfall These show how issues of public discussion span both archive and media verbal debates in formal spaces and visual performances that circulate in unpredictable ways **The Semantic**

Democracy as Death Jason Hickel, 2015-03-07 The revolution that brought the African National Congress ANC to power

in South Africa was fractured by internal conflict Migrant workers from rural Zululand rejected many of the egalitarian values and policies fundamental to the ANC's liberal democratic platform and organized themselves in an attempt to sabotage the movement This anti democracy stance which persists today as a direct critique of freedom in neoliberal South Africa hinges on an idealized vision of the rural home and a hierarchical social order crafted in part by the technologies of colonial governance over the past century In analyzing this conflict Jason Hickel contributes to broad theoretical debates about liberalism and democratization in the postcolonial world Democracy as Death interrogates the Western ideals of individual freedom and agency from the perspective of those who oppose such ideals and questions the assumptions underpinning theories of anti liberal movements The book argues that both democracy and the political science that attempts to explain resistance to it presuppose a model of personhood native to Western capitalism which may not operate cross culturally
