Personal Finance Chapter Credit In America:

Consumer Credit and the American Economy Thomas A. Durkin, Gregory Elliehausen, Michael E. Staten, Todd J. Zywicki, 2014-07-16 Consumer Credit and the American Economy examines the economics behavioral science sociology history institutions law and regulation of consumer credit in the United States After discussing the origins and various kinds of consumer credit available in today's marketplace this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen too fast for too long It then turns to demand and supply with chapters discussing neoclassical theories of demand new behavioral economics and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance This discussion includes review of the economics of risk management and funding sources as well discussion of the economic theory of why some people might be limited in their credit search the phenomenon of credit rationing This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit The book then discusses technological change in credit granting It examines how modern automated information systems called credit reporting agencies or more popularly credit bureaus reduce the costs of information acquisition and permit greater credit availability at less cost This discussion is followed by examination of the logical offspring of technology the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable including payday loans and other small dollar sources of loans discussion turns to legal structure and the regulation of consumer credit There are separate chapters on the theories behind the two main thrusts of federal regulation to this point fairness for all and financial disclosure Following these chapters there is another on state regulation that has long focused on marketplace access and pricing Before a final concluding chapter another chapter focuses on two noncredit marketplace products that are closely related to credit The first of them debt protection including credit insurance and other forms of credit protection is economically a complement The second product consumer leasing is a substitute for credit use in many situations especially involving acquisition of automobiles This chapter is followed by a full review of consumer bankruptcy what happens in the worst of cases when consumers find themselves unable to repay their loans Because of the importance of consumer credit in consumers financial affairs the intended audience includes anyone interested in these issues not only specialists who spend much of their time focused on them For this reason the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics It also examines the psychological sociological historical and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today *Financing the American Dream* Lendol Calder, 2009-07-01 Once there was a golden

age of American thrift when citizens lived sensibly within their means and worked hard to stay out of debt The growing availability of credit in this century however has brought those days to an end undermining traditional moral virtues such as prudence diligence and the delay of gratification while encouraging reckless consumerism Or so we commonly believe In this engaging and thought provoking book Lendol Calder shows that this conception of the past is in fact a myth Calder presents the first book length social and cultural history of the rise of consumer credit in America He focuses on the years between 1890 and 1940 when the legal institutional and moral bases of today s consumer credit were established and in an epilogue takes the story up to the present He draws on a wide variety of sources including personal diaries and letters government and business records newspapers advertisements movies and the words of such figures as Benjamin Franklin Mark Twain and P T Barnum to show that debt has always been with us He vigorously challenges the idea that consumer credit has eroded traditional values Instead he argues monthly payments have imposed strict externally reinforced disciplines on consumers making the culture of consumption less a playground for hedonists than an extension of what Max Weber called the iron cage of disciplined rationality and hard work Throughout Calder keeps in clear view the human face of credit relations He re creates the Dickensian world of nineteenth century pawnbrokers takes us into the dingy backstairs offices of loan sharks into small town shops and New York department stores and explains who resorted to which types of credit and why He also traces the evolving moral status of consumer credit showing how it changed from a widespread but morally dubious practice into an almost universal and generally accepted practice by World War II Combining clear rigorous arguments with a colorful narrative style *Financing the American Dream* will attract a wide range of academic and general readers and change how we understand one of the most important and overlooked aspects of American social and economic life

The Impact of Public Policy on Consumer Credit Thomas A. Durkin, Michael E. Staten, 2012-12-06 As both the twenty first century and the new millennium opened and the old eras passed into history individuals and organizations throughout the world advanced their listings of the most significant people and events in their respective specialties Possibly more important the turn of the clock and calendar also offered these same observers a good reason to glance into the crystal ball Presumably the past is of greatest interest to most people when it permits better understanding of the present and maybe even limited insight into the outlook In keeping with the reflective mood of the time the staff and friends of the Credit Research Center CRC at Georgetown University s McDonough School of Business noted

that the beginning of the new millennium also marked the beginning of the second quarter century of the Center's existence. The Center began at the Krannert Graduate School of Management at Purdue University in 1974 and moved to the McDonough School of Business at Georgetown University in 1997. The silver anniversary of its founding offered the occasion for creating more than another listing of significant past accomplishments and milestones. Rather, it offered the opportunity and indeed a mandate for CRC as an academic research center to undertake a retrospective and future look into the status of research questions pertaining to consumer credit markets. For this reason, the Center organized a research conference which was held in Washington, D.C. Family Finances in the Modern World: Effective Planning for the American Household

comprehensive analysis of the region's all important banking industry. The book examines two-way interactions between macroeconomic policies and financial intermediation not only how these policies affect banking but how banks weather intermediate shocks and how industry incentives can prompt bank portfolio choices that influence economic policy. The report also discusses how elements of a financial safety net including deposit insurance, prudential regulation, protection of creditor rights and legal and judicial enforcement can mitigate factors that make credit more volatile and constrain its expansion. Finally, the report studies how the banking industry's market structure affects its performance. Particular attention is given to the role of government versus foreign-owned banks, access to credit by small and medium-sized enterprises and the development of mortgage credit markets.
