Documenting Cityscapes Iván Villarrea Álvarez, 2015-05-12 While film studies has traditionally treated the presence of the city in film as an urban text operating inside of a cinematic one this approach has recently evolved into the study of cinema as a technology of place From this perspective Documenting Cityscapes explores the way the city has been depicted by nonfiction filmmakers since the late 1970s paying particular attention to three aesthetic tendencies documentary landscaping urban self portraits and metafilmic strategies Through the formal analysis of fifteen works from six different countries this volume investigates how the rise of subjectivity has helped to develop a kind of gaze that is closer to citizens than to the institutions and corporations responsible for recent major transformations Documenting Cityscapes therefore reveals the extent to which cinema has become an agent of urban change in which certain films not only challenge the most controversial policies of late capitalism but also are able to produce spatiality themselves

Contesting Public Spaces Ed Wall,2022-06-01 This book explores concerns for spatial justice as streets squares and neighbourhoods are continuously made and remade through planning processes political ambitions and everyday activities By investigating three sites in London that have been the focus of masterplanning Ed Wall exposes conflicts between planning offices and private developers who direct large urban change and community groups market traders and residents whose public lives are inseparable from their neighbourhoods being reconfigured The book uniquely brings sociological approaches to what are often considered architectural concerns revealing challenges as London s public spaces are designed regulated and lived Through in depth research Ed Wall identifies how uncertainty caused by large scale urban strategies the realisation of visual priorities and uneven relations between private interests public organisations and daily lives determine the public realm of global cities This work is intended for readers interested in how the urban spaces of their cities are continually produced in competing ways from architecture and urban studies scholars to planners and politicians

Fashion and Everyday Life Cheryl Buckley,Hazel Clark,2017-02-09 Taking cultural theorist Michel de Certeau s notion of the everyday as a critical starting point this book considers how fashion shapes and is shaped by everyday life Looking historically for the imprint of fashion within everyday routines such as going to work or shopping or in leisure activities like dancing the book identifies the fashion system of the ordinary in which clothing has a distinct role in the making of self and identity Exploring the period from 1890 to 2010 the study is located in London and New York cities that emerged as as socially ethnically and culturally diverse as well as increasingly fashionable The book re focuses fashion discourse away from well trodden power laden dynamics towards a re evaluation of time memory and above all history and their relationship to fashion and everyday life The importance of place and space and issues of gender race and social class provides the broader framework revealing fashion as both routine and exceptional and as an increasingly significant part of urban life By focusing on key themes such as clothing the city what is worn on the streets the imagining and performing of multiple identities by dressing up and down going out and showing off Fashion and Everyday Life makes a unique contribution to the literature of fashion studies fashion history cultural studies and beyond

of the central role played by urban spaces in science fictional narratives in various media forms from the literary to the ludic to the cinematic Our contributors reflect on the ways diverse urban scenarios are central to the narratives science fictional imaginary and consider the pivotal roles cityscapes play in underscoring major thematic concerns such as political struggles social inequality and other cultural epistemologies The chapters in the collection are divided into three sections examining the city and the body cities of estrangement and cities of the imagination **Street Art, Public City** Alison

Young, 2013-11-20 What is street art Who is the street artist Why is street art a crime Since the late 1990s a distinctive cultural practice has emerged in many cities street art involving the placement of uncommissioned artworks in public places Sometimes regarded as a variant of graffiti sometimes called a new art movement its practitioners engage in illicit activities while at the same time the resulting artworks can command high prices at auction and have become collectable aesthetic commodities Such paradoxical responses show that street art challenges conventional understandings of culture law crime and art Street Art Public City Law Crime and the Urban Imagination engages with those paradoxes in order to understand how street art reveals new modes of citizenship in the contemporary city It examines the histories of street art and the motivations of street artists and the experiences both of making street art and looking at street art in public space It considers the ways in which street art has become an integral part of the identity of cities such as London New York Berlin and Melbourne at the same time as street art has become increasingly criminalised It investigates the implications of street art for conceptions of property and authority and suggests that street art and the urban imagination can point us towards a different kind of city the public city Street Art Public City will be of interest to readers concerned with art culture law cities and urban space and also to readers in the fields of legal studies cultural criminology urban geography cultural studies and art more generally Bodies in the Streets: The Somaesthetics of City Life, 2019-08-12 Cities are defined by their complex network of busy streets and the multitudes of people that animate them through physical presence and bodily actions that often differ dramatically elegant window shoppers and homeless beggars protesting crowds and patrolling police As bodies shape city life so the city's spaces structures economies politics rhythms and atmospheres reciprocally shape the urban soma This collection of original essays explores the somaesthetic qualities and challenges of city life in Europe Asia Africa and the Americas from a variety of perspectives ranging from philosophy urban theory political theory and gender studies to visual art criminology and the interdisciplinary field of somaesthetics Together these essays illustrate the aesthetic cultural and political roles and trials of bodies in the city streets
