Library Data Darby Orcutt, 2009-11-19 Numerical evidence is everywhere and how best to handle and leverage it is a growing concern in the academic world in general and the academic library world in particular. Libraries are not only storehouses and key contacts for library patrons in accessing numbers but are also collectors and users of their own data which is integral to the functioning of the library itself. The essays in *Library Data: Empowering Practice and Persuasion* focus on interpreting and using library generated and outside data in support of data driven practice and data strengthened persuasion. The collection includes such topics as how to make data presentations appealing and effective, applying capital budgeting models to libraries and using data for evaluation and improvement of collections and services. Articles also cover specialized scenarios including reference collection development, serial acquisitions, institutional repositories, web site design, interlibrary loan and bibliographic instruction.

The Sirens' Call Chris Hayes, 2025-01-28 The 1 New York Times Bestseller. One of Barack Obama's Summer Reading List Picks. From the 1 New York Times bestselling author and MSNBC and podcast host, a powerful wide angle reckoning with how the assault from attention capitalism on our minds and our hearts has reordered our politics and the very fabric of our society. An ambitious analysis of how the trivial amusements offered by online life have degraded not only our selves but also our politics. New York Times Brilliant Book. Reading it has made me change the way I work and think. Rachel Maddow. A useful primer on how social media and the attention economy have warped our democracy and reshaped our lives. Barack Obama. We all feel it: the distraction, the loss of focus, the addictive focus on the wrong things for too long. Something has changed utterly. For most of human history the boundary between public and private has been clear at least in theory. Now as Chris Hayes writes, "With the help of a few tech firms we basically tore it down in about a decade." Hayes argues that we are in the midst of a transition whose only parallel is that of labor in the nineteenth century. Attention has become a commodified resource extracted from us and from which we are increasingly alienated. *The Sirens' Call* is the big picture vision we urgently need to offer clarity and guidance. Sirens are designed to compel us and now they are going off in our bedrooms and kitchens at all hours of the day and night, doing the bidding of vast empires, the most valuable companies in history built on harvesting human attention. As Hayes shares, "Now our deepest neurological structures, human evolution, our inheritances and social impulses are in a habitat designed to prey upon, to cultivate, distort or destroy that which most fundamentally makes us human." *The Sirens' Call* is the book that snaps everything into a single holistic framework so that we can wrest back control of our lives, our politics and our future.
