remarkable revival over the last two decades and is discussed and applied today in many disciplines in humanities and social sciences particularly in urban studies geography urban sociology urban anthropology architecture and planning Lefebvre together with David Harvey is one of the leading and most read theoreticians in these fields This book explains in an accessible way the theoretical and epistemological context of this work in French philosophy and in the German dialectic Hegel Marx and Nietzsche and reconstructs in detail the historical development of its different elements It also gives an overview on the receptions of Lefebvre and discusses a wide range of applications of this theory in many research fields such as urban and regional development urbanization urbanity social space and everyday life *Living Stations* Manuela Triggianese, Olindo Caso, Yagiz Söylev, 2021-02-04

Due to the growing demand for mobility as a primary need for people to get to work to obtain personal care or to go travelling cities continue to be faced with new urban challenges Stations represent along mobility networks not only transportation nodes transfer points but also architectural objects which connect an area to the city's territorial plane and which have the potential to generate new urban dynamics In the compact city the station is simply no longer the space to access mobility networks as informed by their dry pragmatism but becomes an urban place of sociality and encounter an extended public space beyond mobility itself Which relationships and cross fertilizations can be significant for the design of the future living stations in the Municipality of Rotterdam How ought these stations to be conceived in order to act as public places for collective action Which archetypical devices can be designed to give a shape to the ambitions for these stations The station as a public space and catalyzer for urban interventions in the metropolitan area of Rotterdam is the focus of the research initiative presented in this publication City of Innovations Project Living Stations is organized around speculating and forecasting on future scenarios for the city of Rotterdam What is the future of Rotterdam with the arrival of a new metro circle line system In the past fifty years every decade of Rotterdam urban planning has seen its complementary metro strategy with profound connections with the spatial planning and architectural themes Considering the urban trends of densification and the new move to the city a new complementary strategy is required The plans to realize 50 000 new homes between the city center and the suburban residential districts in the next 20 years go together with the development of a new metro circle line consisting of 16 new stations 6 of which will connect the new metro line to the existing network Students of the elective City of Innovations Project AR0109 have been asked to develop ambitious but plausible urban and architectural proposals for selected locations under the guidance of tutors from the Municipality of Rotterdam and Complex Projects The Grand Paris Express metro project in France has inspired the course's approach Following the critical essays on the strategic role of the infrastructural project for city development interventions the 10 Visions X 5 Locations chapter is a systematization of the work of 35 master's students with input from designers of the City of Rotterdam and experts and academic from the University of Gustave Eiffel in Paris The research through design process conducted in the City of Innovations project Living Stations consists of documenting and analyzing the present urban

conditions of selected station locations in the City of Rotterdam and proposing design solutions and visualizations of the predicted development of these locations **Worlding Cities** Ananya Roy,Aihwa Ong,2011-06-09 Worlding Cities is the first serious examination of Asian urbanism to highlight the connections between different Asian models and practices of urbanization It includes important contributions from a respected group of scholars across a range of generations disciplines and sites of study Describes the new theoretical framework of worlding Substantially expands and updates the themes of capital and culture Includes a unique collection of authors across generations disciplines and sites of study Demonstrates how references to Asian power success and hegemony make possible urban development and limit urban politics

Spatial-Economic Metamorphosis of a Nebula City Abderrahman El Makhloufi,2013-02-11 This book analyses the long term spatial economic metamorphosis of Schiphol and the Schiphol region as archetypal for a wider international phenomenon of urban development of metropolises across the world It study the origins and course of urban development process by identifying and explaining which collective arrangements including their ambient factors and the visual representations of the city and urbanity have influenced this metamorphosis in a decisive manner 306090 08:

Autonomous Urbanism Emily Abruzzo,Alex Duval,Kjersti Monson,2005-07-14 Now in its fourth year this bi annual journal gains more and more momentum with each new issue Dedicated to addressing architectural issues from perspectives stretching across the theoretical spectrum 306090 gives voice to young up and coming architects designers and academics looking to push the envelope of architectural theory Much of architectural theory and criticism evaluates a project s success based on how it engages the surrounding environment and how it operates formally and aesthetically But there are other forces at play in architecture 306090 08 Autonomous Urbanism focuses on how legislation financing politics and other indirect influences affect architectural strategies How do architects and urbanists generate design methods that are conscious of law financing politics and the market 306090 08 investigates different design strategies focused on harnessing these forces and utilizing them to a purposeful end Vocabularies for an Urbanising Planet: Theory Building through

Comparison Christian Schmid,Monika Streule,2023-10-04 Cartography as an instrument for the analysis of urbanisation processes The speed scale and scope of urbanisation have increased dramatically in recent decades To decipher the rapidly changing urban territories across the planet we need a radical shift in the analytical perspective on urbanisation In this book a transdisciplinary international research team presents an expanded vocabulary of urbanisation processes through a comparison of Tokyo Hong Kong Shenzhen Dongguan Kolkata Istanbul Lagos Paris Mexico City and Los Angeles Based on a novel cartography and on detailed ethnographic and historical explorations this book systematically analyses the diversity of responses to urgent contemporary urban challenges It proposes a series of new concepts that allow us to assess the practical consequences of different urban strategies in everyday life Essential book on urbanism New evaluation models for urbanisation processes Comprehensive analyses and illustrations of the urban patterns of international metropolises

Comparison of urbanisation processes in eight metropolises around the world Constructing Metropolitan Space Jill Simone Gross, Enrico Gualini, Lin Ye, 2018-12-07 There is little question today that processes of globalization affect national and local economies governance processes and conditions for economic competitiveness in the major urban regions of the world In most liberal democratic countries these processes are occurring according to a rationale which attempts to combine strategies of state supported development with increasing local regional governmental decentralization and autonomy Against this background the issue of metropolitan development is being redefined worldwide along with its institutional frameworks modes of governance policy instruments and spatial planning strategies The overarching assumption of this volume is that metropolitan space far from being consolidated as a policy object is currently being redefined and in some instances constructed and contested as a scale through a variety of policy practices related to spatial economic development objectives Through case studies drawn from across four continents the authors reveal a range of interesting cross national commonalities concerning the power that state actors situated at various spatial scales exert as agents in these processes This volume interrogates key research issues raised by these developments and is intended as a contribution to the establishment of a globally comparative analysis of the construction of metropolitan spaces and scales under conditions of globalization and neoliberalization

Jane Jacobs is still here Roberto Rocco, 2023-06-06 On the occasion of Jane Jacobs 100 anniversary the chair of Spatial Planning and Strategy of the Delft University of Technology together with the OTB Research Institute for the Built Environment and the Rotterdam Erasmus University College organised a two day conference on Jane Jacob s legacy at TU Delft on 24 25 May 2016 This event was complemented one year later by a Jane Jacobs Year closing event We wished to celebrate the life and accomplishments of one of the most important urban thinkers of our time someone who has influenced generations of designers and planners and others concerned with the built environment the great Jane Jacobs This volume contains a number of papers presented at the celebratory conference held at TU Delft in May 2016 with six tracks coordinated by guest scholars Track 1 Jane Jacobs ethics and the just city Track 2 Jane Jacobs and Street Spaces Streets as public places Track 3 Jane Jacobs and the dynamics of neighbourhoods Track 4 Jane Jacobs and the Reshaping old urban fabrics in Chinese cities Track 5 Jane Jacobs and organised complexity Track 6 Jane Jacobs and safety in public space

Formal Methods in Architecture and Urbanism, Volume 2 Catarina Ruivo, David Leite Viana, Franklim Morais, Jorge Vieira Vaz, 2021-10-26 This volume contributes to the debate on the application in the disciplines of architecture and urbanism of new formal methods and methodological advances based on tools from mathematics From millennial geometry to current shape grammars several formal approaches to architecture and urbanism are presented here in order to look at the potentials and purposes of these formal methods both those on the horizon and those already accomplished This book promotes the use of formal methods in the creation of new explicit languages for problem solving in the field This collection of papers will help students academics researchers and practitioners developing formal methods towards the

digitalization of the architecture and urbanism sector Cities and Fascination Wolf-Dietrich Sahr,2016-05-23 Bringing together leading urban scholars this book discusses the linkages between the economic social and psychological factors of the urban environment It focuses on the growth of private urbanity that has led to a spectacularization of the city the most extreme component of attention being the fascination which is aroused by attractions and state managed events The complex characteristics of this fascination are examined under the dimensions of aesthetics emotions lived experiences and power structures and governance The interdisciplinary nature of this collection has wide international appeal and will be of interest to academics of social and cultural geography and cultural and media studies **Designing the City of Reason** Ali Madanipour,2007-04-11 With a practical approach to theory Designing the City of Reason offers new perspectives on how differing belief systems and philosophical approaches impact on city design and development exploring how this has changed before during and after the impact of modernism in all its rationalism Looking at the connections between abstract ideas and material realities this book provides a social and historical account of ideas which have emerged out of the particular concerns and cultural contexts and which inform the ways we live By considering the changing foundations for belief and action and their impact on urban form it follows the history and development of city design in close conjunction with the growth of rationalist philosophy Building on these foundations it goes on to focus on the implications of this for urban development exploring how public infrastructures of meaning are constructed and articulated through the dimensions of time space meaning value and action With its wide ranging subject matter and distinctive blend of theory and practice this book furthers the scope and range of urban design by asking new questions about the cities we live in and the values and symbols which we assign to them **A Possible Way Out** Ahmed Soliman,2004 A Possible Way Out brings together the research and experience gained in the last two decades on the issue of informal housing in Egypt This work sheds light on the process of housing informality in three Egyptian cities Greater Cairo Alexandria and Tanta and focuses on the different paths followed to informality The diversity of case study materials and the specific policy focus make this book an important contribution to the formulation of future urban strategies in the South Literature, Geography, and the Postmodern Poetics of Place E. Prieto,2012-12-28 Using contemporary literary representations of place this study focuses on works that have participated in the emergence of new conceptions of place and new place based identities The analyses draw on research in cultural geography cognitive science urban sociology and globalization studies Planning Cities with Nature Fabiano Lemes de Oliveira,Ian Mell,2019-02-02 This book explores novel theories strategies and methods for re naturaling cities It enables readers to learn from best practice and advances the current theoretical and empirical understanding in the field The book also offers valuable insights into how planners and policymakers can apply this knowledge to their own cities and regions exploring top down bottom up and mixed mechanisms for the systemic re naturaling of planned and existing cities There is considerable interest in naturalising cities since it can help address multiple global societal challenges and generate

various benefits such as the enhancement of health and well being sustainable urbanisation ecosystems and their services and resilience to climate change This can also translate into tangible economic benefits in terms of preventing health hazards positively affecting health related expenditure new job opportunities i e urban farming and the regeneration of urban areas There is thus a compelling case to investigate integrative approaches to urban and natural systems that can help cities address the social economic and environmental needs of a growing population How can we plan with nature What are the models and approaches that can be used to develop more sustainable cities that provide high quality urban green spaces
